

# Can't connect to the App Store on iOS 11? Here's how to fix it

Just like any new version of Apple, full updates will always encounter a problem. iOS 11 is no exception - one of the problems it faces is that it cannot connect to the App Store on some iPhone and iPad devices. So how to fix it? Please follow the article below!

Just like any new version of Apple, full updates will always encounter a problem. iOS 11 is no exception - one of the problems it faces is that it cannot connect to the App Store on some iPhone and iPad devices.

Some users, when unable to connect to the App Store, can fix it by completely closing the application from App Switcher or restarting the device. However, not all cases can apply such methods. Here's another fix when you can't connect to the App Store on iOS 11.

1. How to fix some common errors on iOS 11
2. How to fix battery drain errors on iOS 11
3. Control Center iOS 11 doesn't really disable Wifi or Bluetooth? This is what you need to do

Open the App Store app and notice the date on the homepage. You will find it asynchronous, preventing the app store from connecting to Apple's server, and creating error messages like " *Cannot connect to App Store* " and does not allow users to download or update the application. use.

Press home to open

Next, go back to the main screen and open the **Settings** app . Click the **General** tab , then scroll down and select **Date & Time** . Now, turn off the slider beside the **Automatically Automatically Set** option. You can set the time and date manually to match the date displayed in the main section of the App Store.

After that, visit the App Store again. This time, wait at the home page for about 30 seconds and then return to the **Date & Time settings** and reactivate the **Automatically Set** option .

Now access the App Switcher by double-clicking the Home button or through the AssistiveTouch virtual Home key and closing the App Store completely by swiping up. Open the App Store again, now you will see its home page showing the current date. The connection between the App Store and Apple servers has been restored. Now

you can download or update the application as usual.

This is not the best solution but it will be effective in recovering important functions of the App Store application and updating the application. If you encounter an error that cannot connect to the App Store, try the above steps!

Good luck!
