

Can't find Disk Cleanup Win 11, how to find it quickly

Can't find Disk Cleanup Win 11, making it difficult for you to clean up your drive? Don't worry because TipsMake will guide you to fix the error

It is an extremely useful feature used to clean up drives on Windows 11. Since its appearance, Disk Cleanup has received positive feedback from users. However, the problem here is that many people **cannot find Disk Cleanup Win 11**. This makes the experience of using Win 11 greatly affected. If you can't find Disk Cleanup on your computer, go to the information provided by **TipsMake** in the next section.

Why can't Disk Cleanup Win 11 be found?

It's a pretty convenient feature, but not everyone knows how to open Disk Cleanup in Windows 11. This is mostly because Windows 11 is still quite new and users don't know how to operate it yet. In addition, the fact that users cannot find Disk Cleanup in Win 11 may also be due to some software errors on the computer.

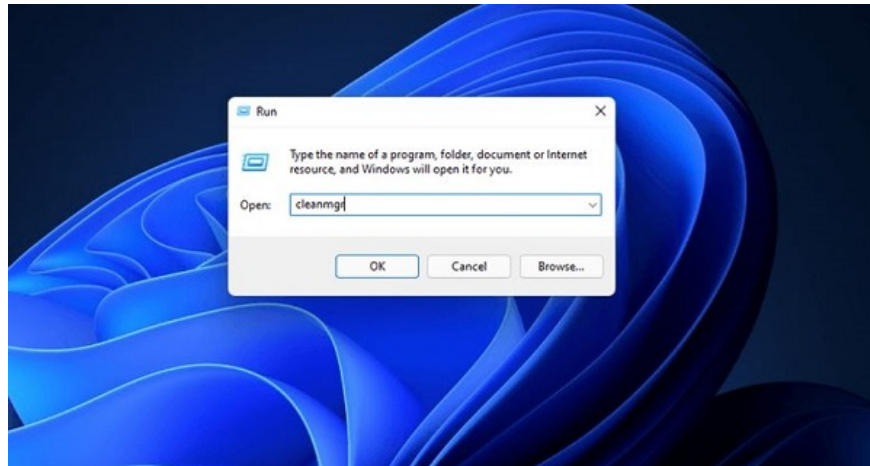

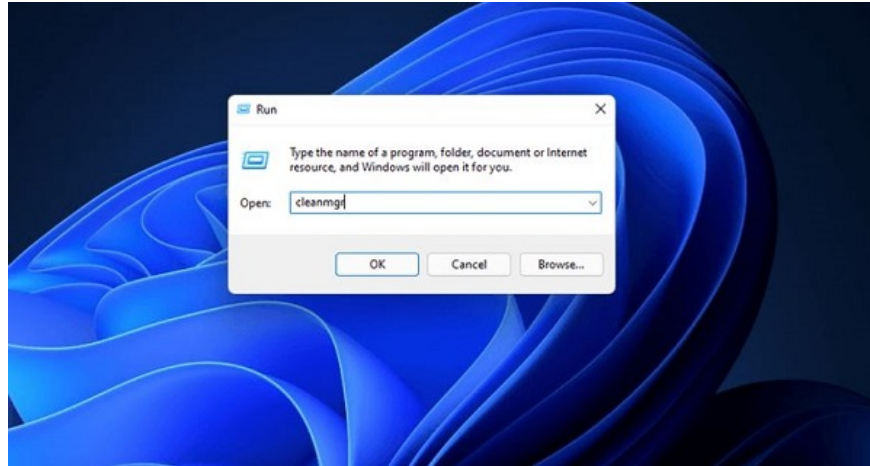

Ways to open Disk Cleanup on Windows 11

Currently there are many ways for us to start Disk Cleanup on Win 11. Below are the most popular ways to start Disk Cleanup, see if any of them work for you!

1/ Open with the Run dialog box

When you want to access a certain program on your computer. Many people will immediately think of the Run dialog box. And if you want to open Disk Cleanup on Win 11, you can of course use this method.

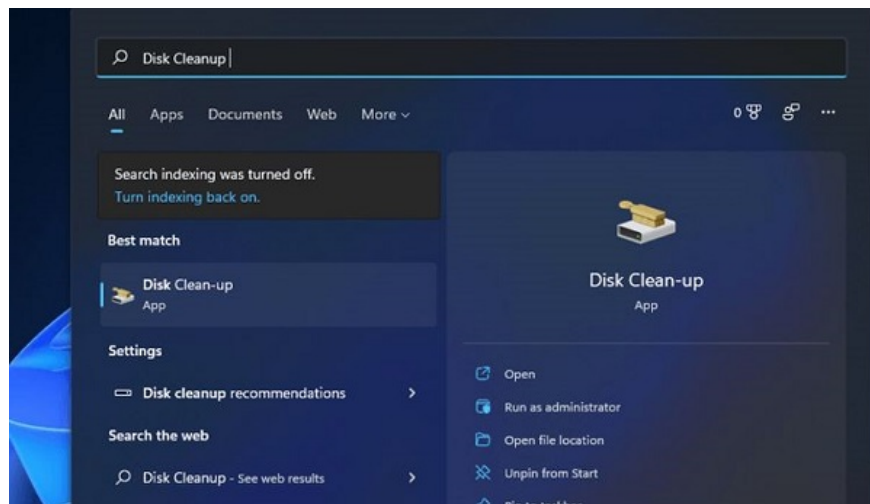

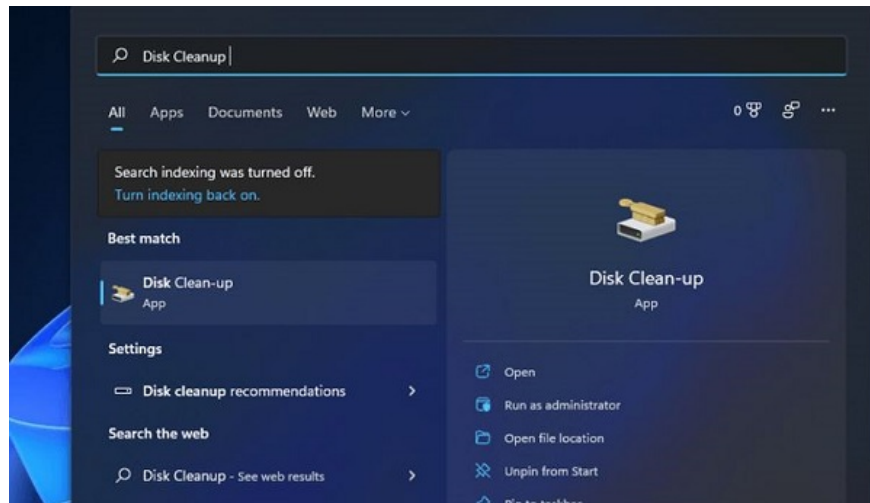

1. **Step 1** : Start the Run dialog box by pressing Windows + R or you can also press **Windows + X** and then select **Run** in the options.
2. **Step 2** : Type the keyword **cleanmgr** in the blank box and press **enter** to start Disk Cleanup.

2/ Open Disk Cleanup using the search bar

Similar to the Run dialog box, the search bar on the computer is also used to find and open a number of different programs. Therefore, when you want to open Disk Cleanup, you can also find and open it in the search bar.

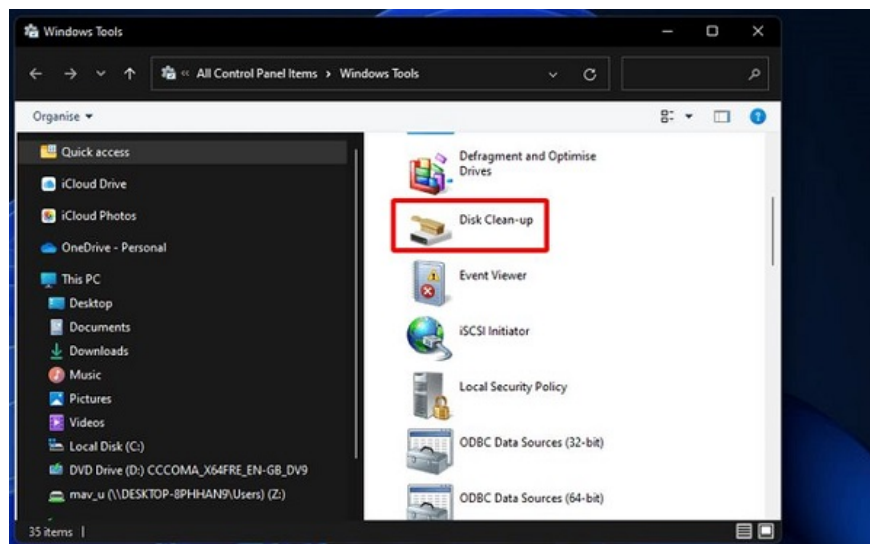

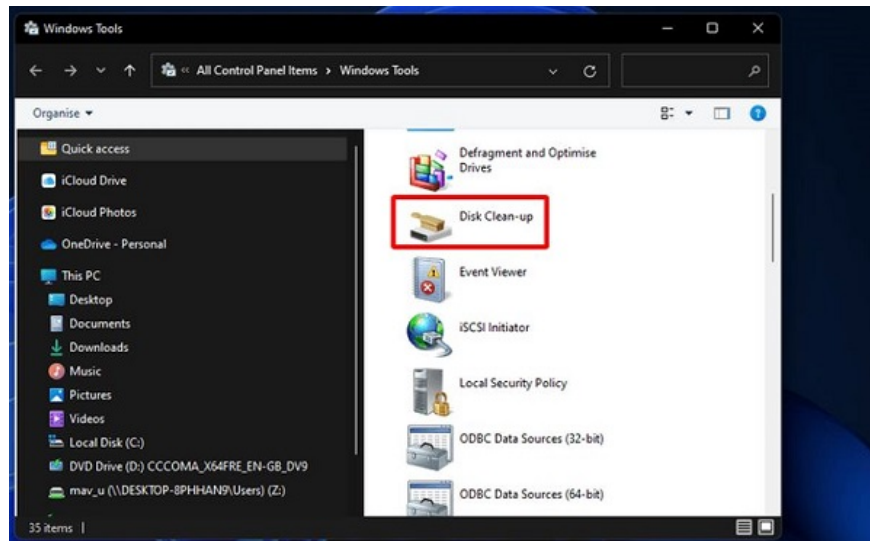

1. **Step 1** : Press Windows + S to open the search bar.
2. **Step 2** : Enter the keyword **Disk Cleanup** and select **open** as shown.

3/ Open Disk Cleanup in control panel

If you don't want to use the above two methods, you can also find and open Disk Cleanup in the control panel. In my opinion, you should only refer to this method to know. Because basically it will be a bit more complicated than the two methods above.

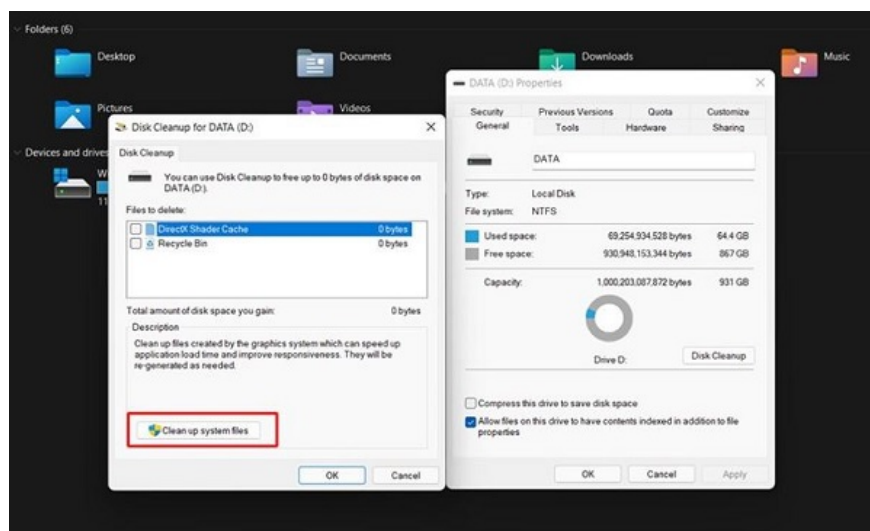

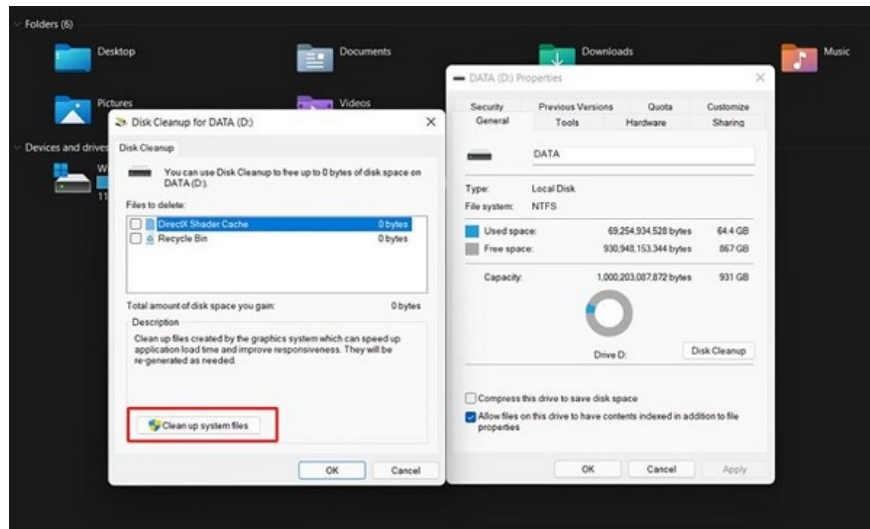

1. **B1** : Open the search bar and enter the keyword **control pane l** and press **enter** .
2. **Step 2** : In the control panel window, click on **view by** and select **Large icons** to display all.
3. **Step 3** : Select the **Windows Tools** section and you will see the Disk Cleanup section as shown.

Instructions on how to Disk Cleanup Windows 11

Above, I showed you a few ways to open Disk Cleanup Windows 11. Now, I will show you how to use this feature.

1. **Step 1** : Right-click on the drive you want to clean up then select **Properties** .
2. **Step 2** : Open the **General** tab , then click **Disk Cleanup** .
3. **Step 3** : When the new window appears, select **Clean up system files** to start the cleaning process.

With this method, you can quickly clean up and free up storage space on your computer. Not only that, you can absolutely apply this method if you want to clean up Windows 11 after updating.

And above is the information related to not finding Disk Cleanup Win 11. In case you have tried everything but still cannot find Disk Cleanup. Now try updating the operating system or reinstalling Windows and see what happens!
