

How to use Caret Browsing on Microsoft Edge

Microsoft Edge offers a variety of features to enhance the user experience, including Caret Browsing.

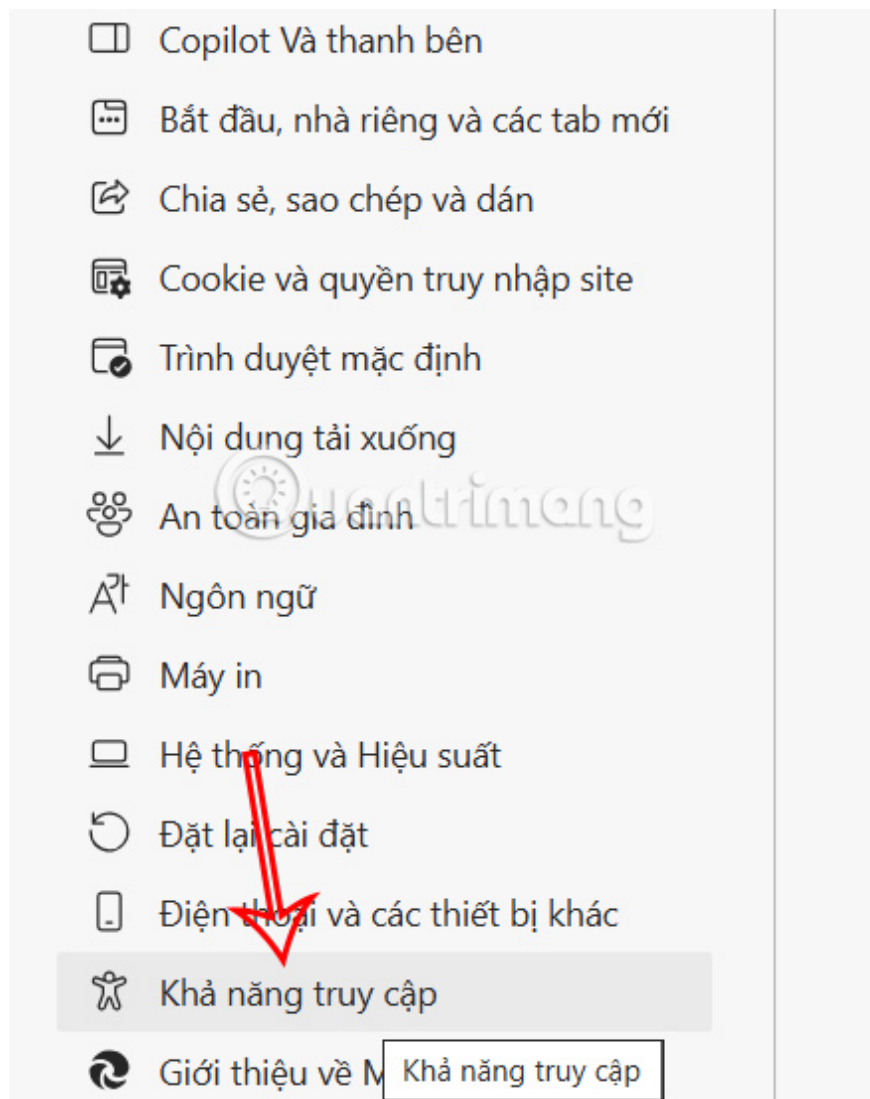

Microsoft Edge offers a variety of features to enhance the user experience, including Caret Browsing. This feature allows you to navigate and select text on a web page using the keyboard instead of using a mouse. Caret Browsing is represented by an active cursor on web pages, allowing you to move through text, select sections, and copy content. Here is a guide to using Caret Browsing on Microsoft Edge.

How to Enable Caret Browsing on Microsoft Edge

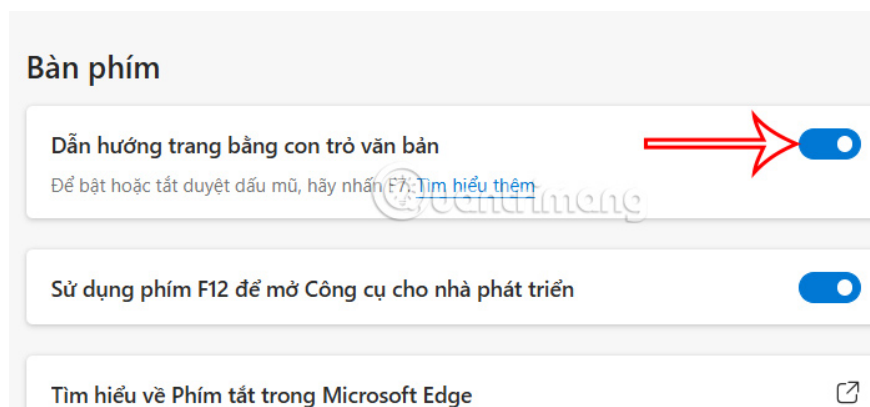

To enable Caret Browsing on Microsoft Edge, **use the F7 keyboard shortcut** while you are reading a web page in Edge. A pop-up will appear notifying you of keyboard browsing, **click Enable** to do so.

Or you go to **Settings on Edge** and select **Accessibility** .

Look to the sidebar and find **the Keyboard group** , then **enable Navigate pages with text cursor** .

How to use Caret Browsing on Microsoft Edge

Basic Navigation

1. The arrow keys on your keyboard play an important role in navigating content:
2. Up Arrow: Move the cursor up one line.
3. Down Arrow: Move the cursor down one line.
4. Right Arrow: Move the cursor one character to the right.
5. Left Arrow: Move the cursor left one character.

You can hold these keys to move through text faster.

Select text

1. Press and hold the Shift key while using the arrow keys to select or highlight text on a web page. For example:
2. Shift + Right/Left Arrow: Highlight one character to the right/left of the caret.
3. Shift + Up/Down Arrow: Highlight text one line above/below the caret.
4. To expand the selection range, you can continue holding the arrow keys.

Copy and paste text

Once you have selected the desired text, use Ctrl + C to copy it and Ctrl + V to paste it elsewhere. This is especially useful for quickly copying content from websites.
