He has 15 fingers and 13 toes

Since his birth in 1/2016, Chinese boy Hong Hong has owned 15 fingers and 13 toes despite still having 2 hands, 2 feet like normal people.

According to the diagnosis, Hong Hong suffers from polydactyly - an abnormal birth defects. His mother also has 6 fingers on each hand and leg.

Ms. Zhang Ruifang "horned" in her forehead

Ms. Zhang Ruifang in Henan, China was dubbed the 'goat' by having a large horn about 6cm long on her forehead. In particular, this horn only began to appear when she hit the 100-year-old mark. Previously, Zhang's mother and Zhang's grandmother also grew horns when they were old.

According to doctors, the horn is like a pigment tumor, made up of keratin protein that makes up hair, nails and horns in animals.

The man has 3 legs and 2 hearts

George Lippert was born in 1840 in Bavaria, Germany with the third leg in the middle developed quite well. He worked in a circus and was famous for his leg leg.

But Mr. George did not know that, I still have 2 separate hearts, healthy and fully functional. After he died of tuberculosis, the autopsy doctors discovered this strange thing. According to experts, George Lippert is actually a parasitic twin.

The only boy in the world that has a complete sequence of strange DNA

The young Alfie Clamp when he was born was blind and had some capacity defects. The reason is that the boy has an excess of DNA sequences on the 7th chromosome.

Doctors who have never heard of such a case before, Alfie are the only person in the world who has a legacy of DNA. Currently, Alfie faces a number of health problems such as poor digestion, unable to metabolize some nutrients and muscle weakness, but fortunately he is still growing normally.

The mother has two wombs

Hannah Kersey, an English woman who gave birth to her first child, found out that her reproductive organ developed abnormally and had two babies. This is a rare situation in the world, 1 million women have 1 person.
