

# Causes and how to fix low sound headphones in the most detailed way

What is the cause of low volume when listening to Bluetooth? How to fix low volume headphones? Refer to the simplest steps from A to Z.

*If you use your headphones for a long time or do not maintain them properly, your Bluetooth headphones may have sound problems. The problem of low volume on Bluetooth headphones is a common occurrence. What causes low volume on Bluetooth ? How to fix low volume on headphones? Let's find the answer in the article below!*

## Reasons why bluetooth headphones have low volume

There are many reasons why headphones have low, unclear sound. It could be one of the following cases:

- **Water seepage:** Water seepage into the headset is one of the reasons why the bluetooth headset has a low sound. During use, you may accidentally drop the headset into water, get it soaked in rain,. All of these reasons lead to the bluetooth headset having a low sound, which is an obvious thing that can happen.
- **Software error on the phone:** The software on the phone device may be faulty, leading to unstable transmission. There may be many applications running on your device, the applications clash with each other and cause errors, leading to low volume on the bluetooth headset.
- **Broken bluetooth headset speaker:** **Headphones** in the process of long-term use will cause damage to the external components, especially the speaker membrane. Once the speaker membrane is broken, the sound will not be dispersed, leading to the bluetooth headset being low-sounding or damaged on one side.

- **Listening area near interference area:** Bluetooth is a wireless audio connection device, so Bluetooth headset errors occur in the case of signal interference, which is very likely if you are in an area with heavy interference.

## **How to fix low volume bluetooth headphones**

### **Restart the bluetooth headset:**

Since this headset is connected wirelessly, the transmission may be problematic. In this situation, you should restart the bluetooth headset. You just need to find and hold the power button for a while until the light turns off. When you turn it on, do the same until the light turns back on. Next, find the matching headset device name and pair it again.

### **Use Bluetooth headphones close to your Wi-Fi router, computer**

Devices such as computer routers emit radio waves. If you are near a mixture of different types of radio waves, the sound quality of your Bluetooth headset will be affected. Therefore, you should use Bluetooth headsets at a distance to avoid radio wave interference. If your headset has a noise cancellation function, turn it off so as not to affect the sound emitted from the headset.

### **Keep Bluetooth device in pocket or bag while listening to audio**

**Your body may obstruct the Bluetooth headset** 's Bluetooth antenna, causing transmission problems. So move the Bluetooth device to a location free of obstructions instead of keeping it in a pocket, bag, or purse.

## **Re-weld the speaker membrane that was broken.**

The speaker membrane coming off is a common problem for many people. To fix this error, you need to remove all the components of the bluetooth headset, reattach the speaker membrane that has fallen off and weld it firmly.

If you cannot fix it yourself, you can go to accessory repair centers to help you solder each joint of the headphone membrane effectively and safely.

Headphones are small, compact, easy to transport, and inexpensive, so they are smuggled in by many "brokers" in many ways, most of which are unofficial. Through these unofficial channels, the products are often very cheap, with quality and warranty being loose, which is mostly a risk for the buyer.

## **Where to buy cheap genuine headphones?**

With continuous efforts over the years, the Vietnamese headphone market has gradually shaped its distribution channels, diversifying brands and device types. Thanks to that, many people can **own genuine headphones** with high reliability.

At professional **headphone stores**, buyers will experience many headphones from most major brands such as Beats, Sony, Sennheiser, Audio Technica, Bose, Shure, etc.

TipsMake is one of the reputable headphone stores you can choose. After many years of establishment, **TipsMake** has a solid position in the market. Currently, TipsMake has developed a chain of stores stretching from North to South. The staff is young, enthusiastic and friendly, and well-trained in customer service. You just need to pick up the phone and contact us via hotline: **1900.1903**

## **Conclude**

For each cause of the Bluetooth headset being small, we need to have a different way of handling it. If it is a fixable error, you can apply it as I instructed above. In case the product has a technical error and cannot be repaired, you can take it to a repair shop or consider buying yourself a new headset, ensuring sound quality.
