

# CES 2022: ASUS ZenBook 17 Fold, one of the most beautiful laptop models ASUS has ever launched

Without a doubt, ASUS is one of the brands that is making the biggest splash at this year's CES, with successive launches of a series of extremely exciting new products.

For example, in the case of ZenBook 17 Fold, a 17-inch OLED laptop with a folding screen possesses a beautiful design and extremely powerful hardware configuration.

In fact, it can be said that the ZenBook 17 Fold is a tablet, because it has an OLED panel that can be folded in half to become a laptop when needed. Similar to the way of 'transforming' from a phone to a tablet that we have seen on many folding screen smartphones today.

ASUS Zenbook 17 Fold owns a rather large touch screen, up to 17.3 inches, 2.5K resolution and 4:3 aspect ratio. This panel supports a contrast ratio of 1,000,000:1, 100% DCI-P3 color gamut, 0.2 ms response time and 90Hz refresh rate. In addition, the monitor is also Pantone-certified, meets VESA's DisplayHDR 500 True Black standard, and supports Dolby Vision.

What's special is that the screen of the Zenbook 17 Fold can be partially folded to create two 3:2 ratio screens, with the keyboard placed in the bottom half. At this point, the device can be effectively used as a 12.5-inch laptop with Full HD resolution. Of course, if you still want to take advantage of the full 17.3-inch panel size, you can place the keyboard on the tabletop and prop the tablet up. Obviously flexibility in usability is unquestionable on the ASUS Zenbook 17 Fold, no matter whether you use the device for work or play.

In terms of specifications, Zenbook17 Fold is equipped with the latest 12th Gen Intel Core i7 U-Series CPU, comes with up to 16GB LPDDR5 RAM, 1TB NVMe M.2 SSD internal memory, and Intel Iris Xe Tinh GPU. fit. Powering the device is a rather large 75Wh battery, which can be quickly charged via 2 USB-C Thunderbolt 4 ports.

A few other notable equipment includes the ability to support WiFi 6E and Bluetooth 5.2 connectivity, a 4-speaker Dolby Atmos system tweaked by Harman Kardon, HD IR Camera with Windows Hello support and a new Intel Visual Sensing Controller chip that supports support features such as user presence detection. In addition, Zenbook17 Fold is equipped with a built-in color sensor to automatically adjust screen brightness, and a 5 MP webcam with ASUS noise reduction technology for better quality video calling.

ASUS Zenbook 17 Fold OLED will officially go on sale in the second quarter of 2022. However, the specific price has not been disclosed by ASUS.
