

Chance to join Google Indie Games Accelerator, the program to create 'blockbuster' mobile game for Vietnamese developers

Google Indie Games Accelerator is a Google program to train potential developers from Asian countries like India, Indonesia, Malaysia, Pakistan, Philippines, Singapore, Thailand or Vietnam so they can build , expand, release and trade successively next-generation mobile blockbuster titles.

Google Indie Games Accelerator is a Google program to train potential developers from Asian countries like India, Indonesia, Malaysia, Pakistan, Philippines, Singapore, Thailand or Vietnam so they can build , expand, release and trade successively next-generation mobile blockbuster titles.

If your startup company is located in the above-mentioned Asian countries and is looking for a resource to grow, Indie Games Accelerator is your chance. Find out the information and register for this program by Google before July 31.

If selected to participate in the program, developers will be free to attend two game training camps at Google Asia Pacific office, Singapore. Here, they will have the opportunity to access Google's best resources from networks, information and technology to people. In the process of attending, they will receive personal advice from Google team and many industry experts. In addition, teams are also given a Google Cloud Platform 'cloud' service package and have the opportunity to attend exclusive events in the industry or organized by Google.

On August 8, 2018, Google will announce a list of developers selected to participate in the Google Indie Games Accelerator program.

Wait any longer, quickly access the link below to register and join Google to create 'blockbuster' games.
