

Chat multiple nick without installing additional programs

There are many ways to chat multiple nicknames in the same computer: you can go online with the Yahoo! Messenger has just been online on YM online support websites; Or you can install a 3rd party software. But there is a much simpler way to help you chat with real nick without installing additional programs.

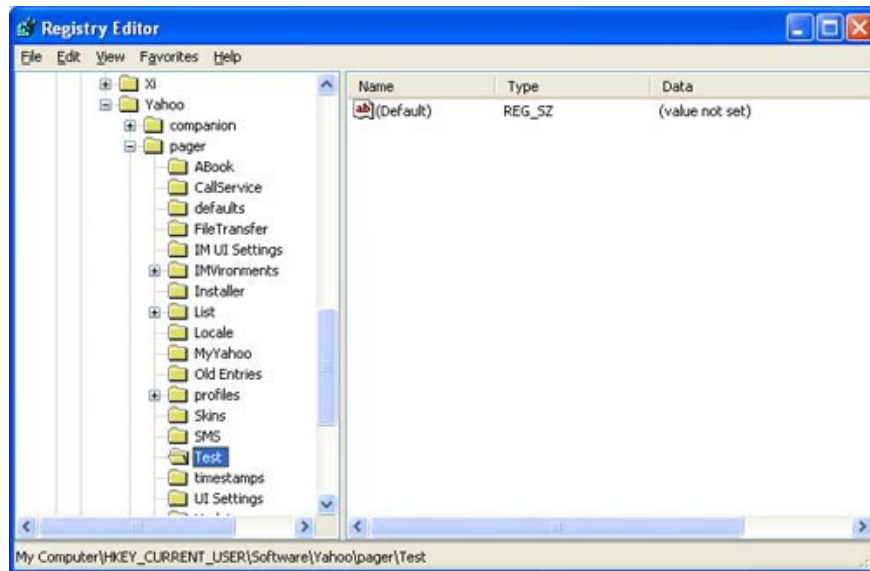

There are many ways to chat multiple nicknames in the same computer: you can go online with the Yahoo! Messenger has just been online on YM online support websites; or you can install a 3rd software. A reader after reading a lot of chat with Yahoo Messenger 8.0 on **TipsMake.com** has responded and wanted to share a much simpler way that can help you Chat with many real nick without installing additional programs.

How to do the following :

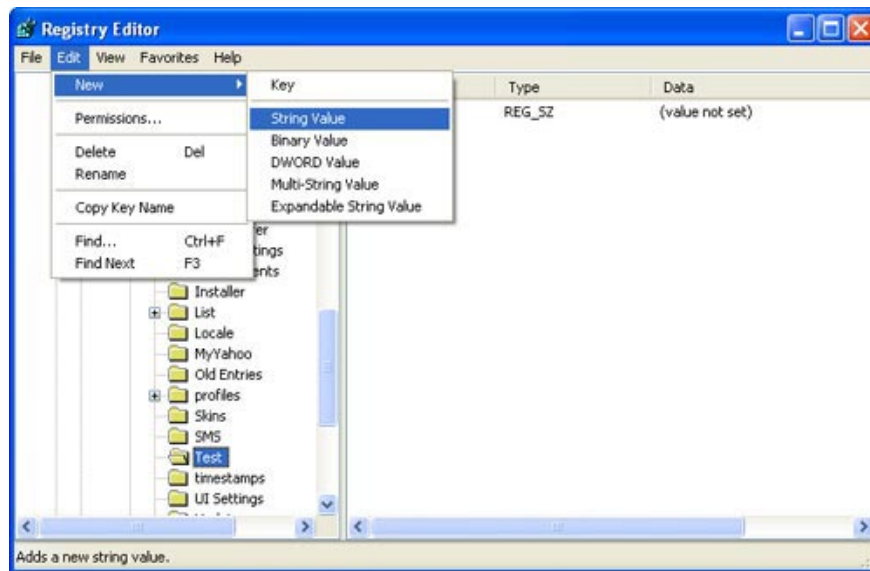

Go to *Start -> Run* , enter *regedit* -> press *Enter* or *OK*

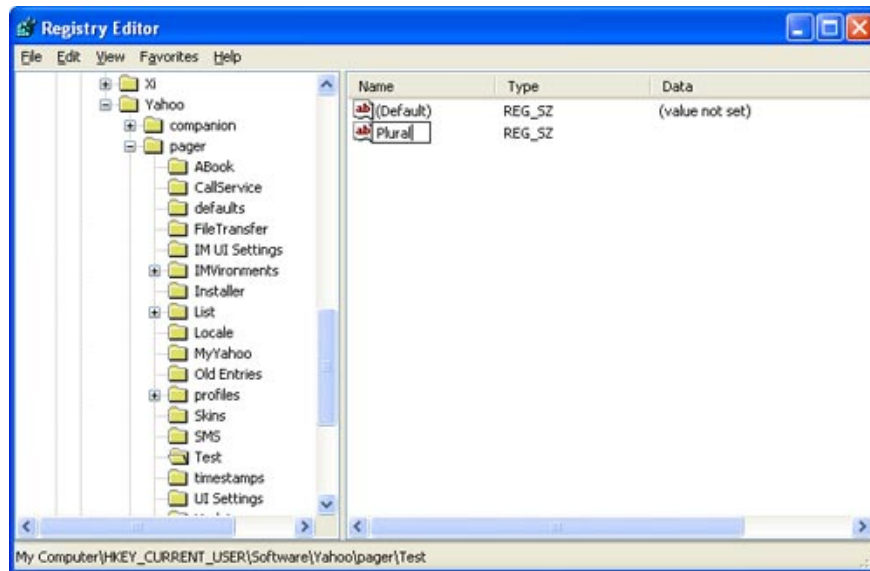

In the *Registry Editor* window, select *HKEY_CURRENT_USER* -> *Software* -> *Yahoo* -> *Pager* -> *Test*

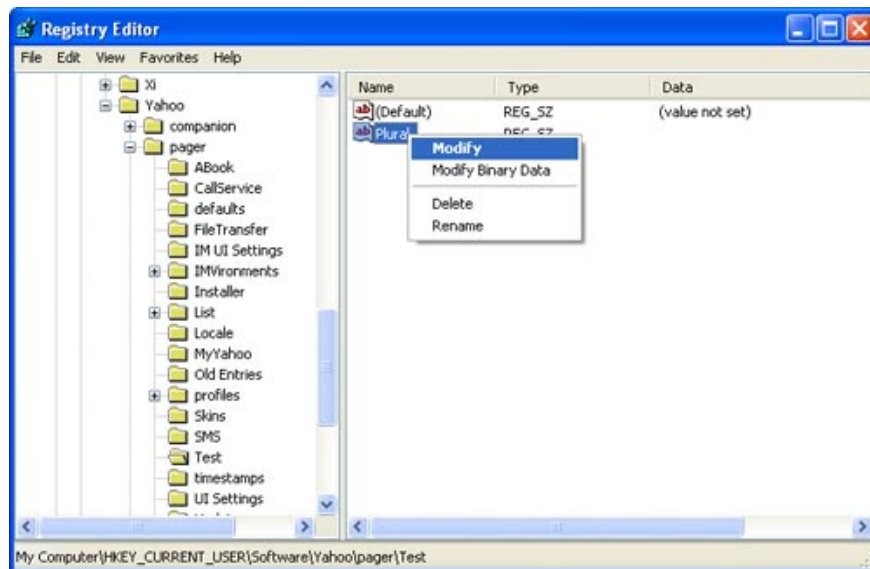

Create a Key by going to *Edit -> New -> String Value*

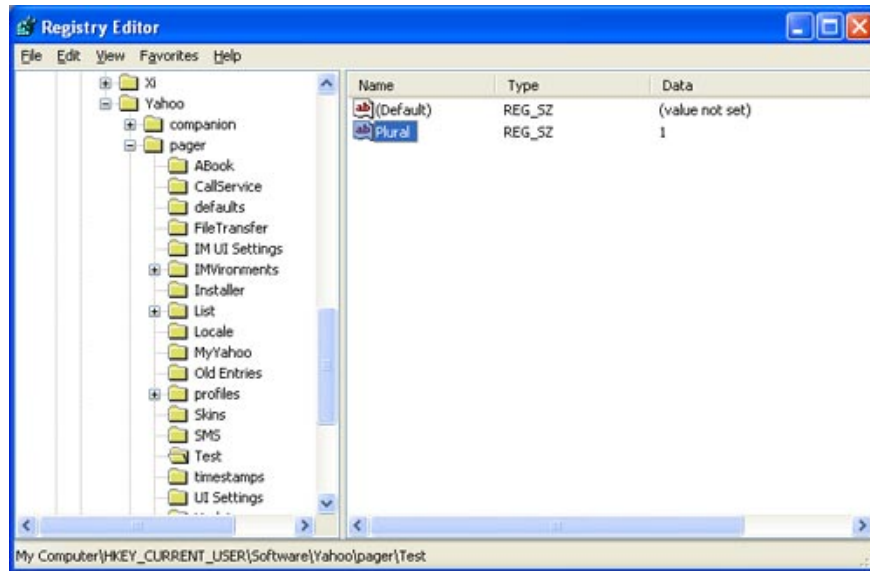

Rename the newly created item **Plural**

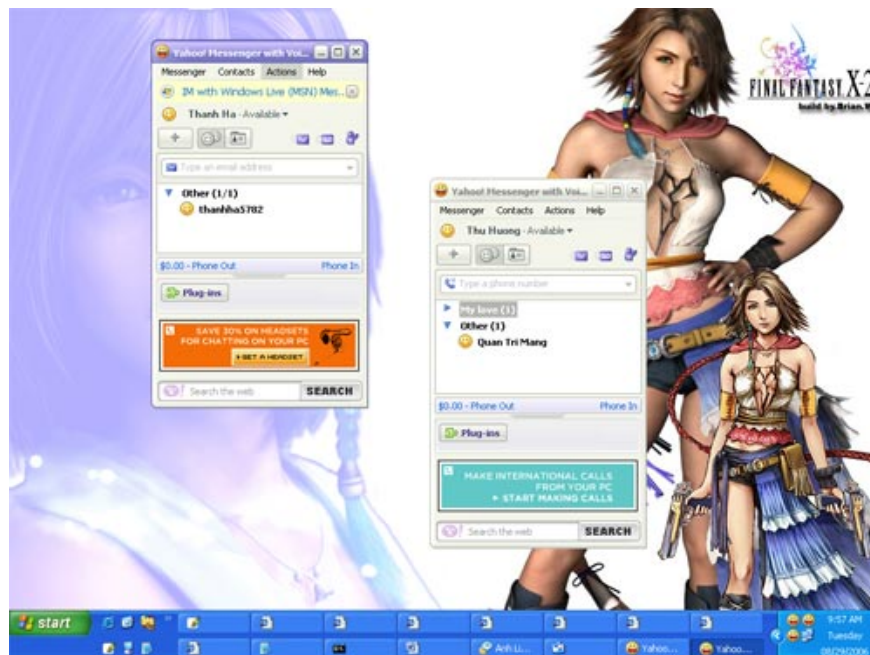

Right-click on a new component (**Plural**) select *Modify* to set the *Value* of the component value to **1** .

The end result is the Registry screen as follows:

The simple thing that you have to do is restart the computer. Every time you want to online with a new nick, you start Yahoo! Normal Messenger.
