It weighs less than 1.5 kg, uses the most advanced chip, Core i3 Ivy Bridge, 4 GB of RAM and a battery of up to 3 hours.

It weighs less than 1.5 kg, uses the most advanced chip, Core i3 Ivy Bridge, 4 GB of RAM and a battery of up to 3 hours.

Lenovo said the **IdeaPad S210** will be sold in Japan this **July** . According to *Liliputing* , although not yet announced the price, but IdeaPad S210 is predicted to be a cheap model because the product configuration is only quite good and not too thin and light.

Lenovo IdeaPad S210 has a mid-range configuration. (*Photo: Liliputing*).

Lenovo IdeaPad S210 has 11.6-inch multi-touch screen, size 29.97x20.57x2.28 cm and weighs 1.4 kg. Users can choose either silver or black.

In terms of configuration, this model is equipped with Intel Celeron 1017U or Core i3-3227U Ivy Bridge chips. It uses 4GB RAM, 16GB SSD drive and supports multiple connections like standard Wi-Fi, Bluetooth 4.0, HDMI, Ethernet, USB 2.0 and USB 3.0. The screen of the device has a resolution of 1,366x768 pixels.

It uses a removable 3 cell battery. Users can spend an additional amount to equip a 6-cell battery for the product. However, the manufacturer said the continuous operating time of IdeaPad S210 only lasts up to about 3 hours.
