

Check fake emails, check if an email address exists or not

Currently, the situation of impersonating email a lot of users. You need to be careful with the content of the email sent to you from strange emails. Need to determine whether the message was sent from real or fake email address.

Currently, the situation of impersonating email a lot of users. You need to be careful with the content of the email sent to you from strange emails. Need to determine whether the message was sent from real or fake email address.

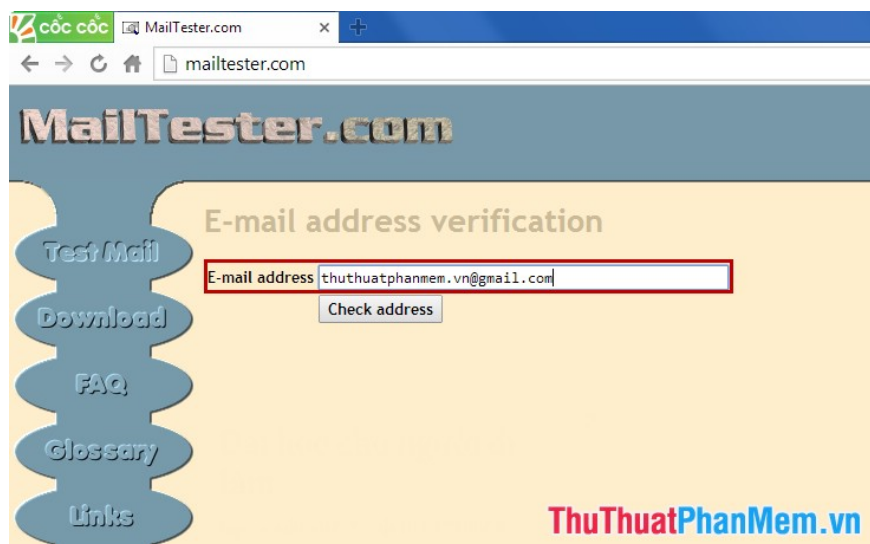

Usually you send a reply to that email, if the message does not prove that the email is fake, if the message is sent, it is a real email address.

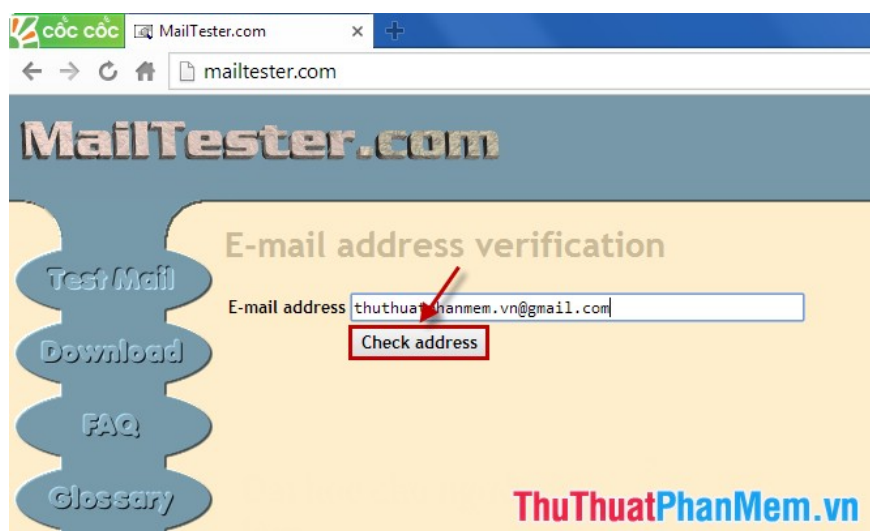

In addition, you can use some online websites to check whether emails are real or fake quickly.

MailTester <http://mailtester.com/>

Step 1: You access the website mailtester.com, then enter the email address to be verified in the text box next to **E-mail address** .

Step 2: Click **Check address** to start checking email.

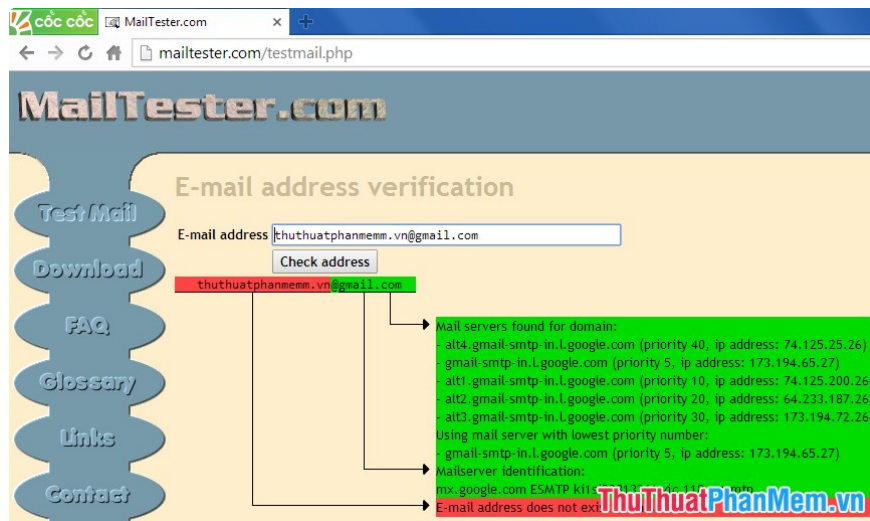

Step 3: Check the results.

After conducting testing and analysis, the website will give the results. If all results in green background are real email (email exists).

If the result shows up with a color other than green (yellow or red) is a fake email (the email doesn't exist).

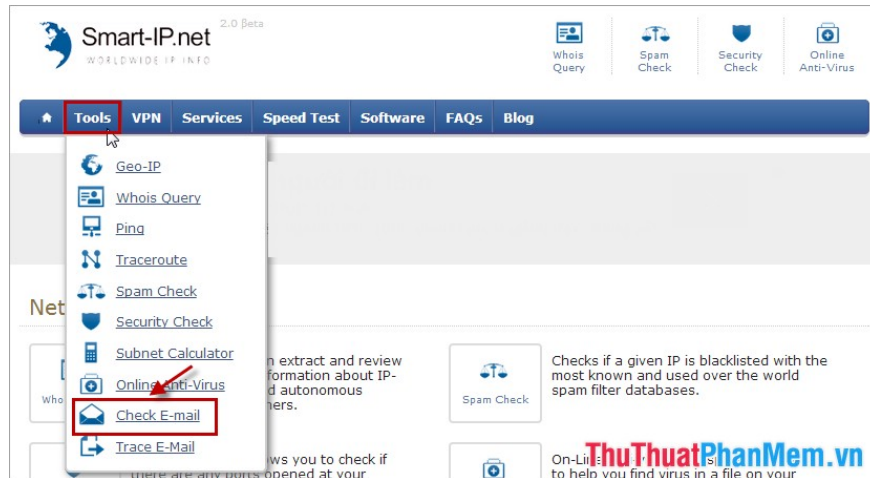

Smart-IP.net <http://smart-ip.net/>

This is a website that provides many useful tools to check websites, check files for viruses and check whether emails are real or genuine.

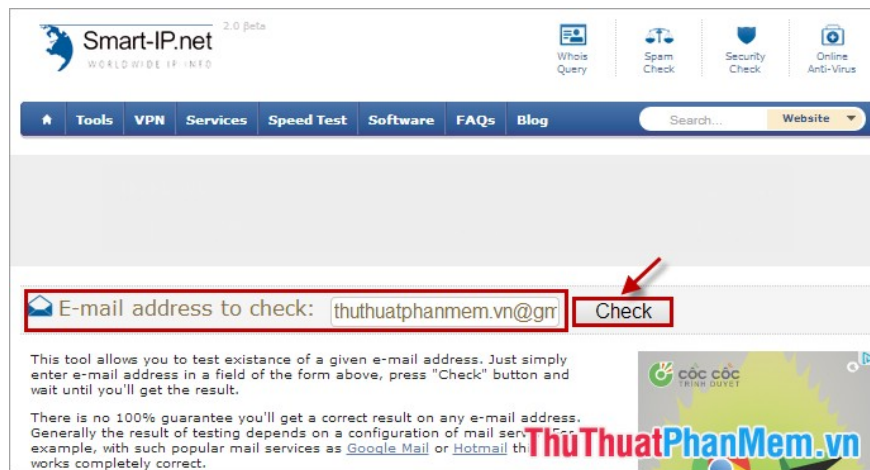

Step 1: You access the website *smart-ip.net*.

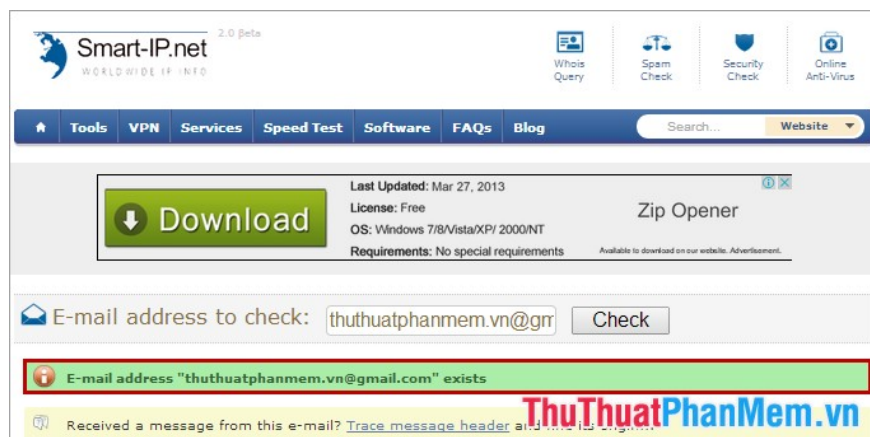

Step 2: Select Tools -> Check E-mail .

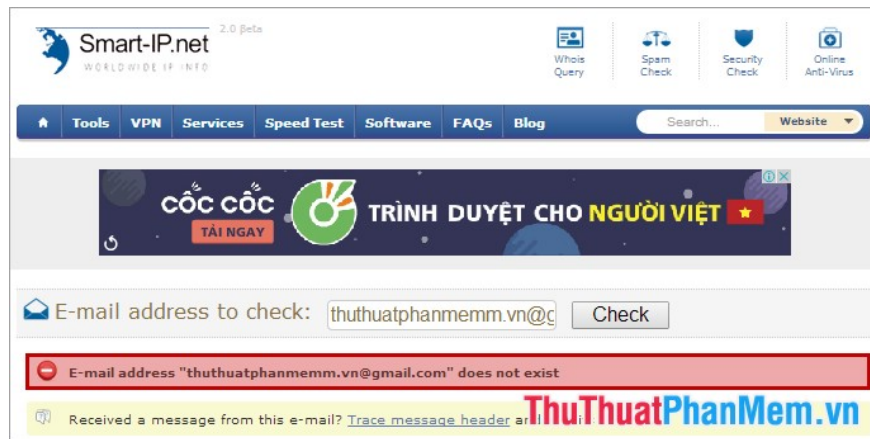

Step 3: Enter the email address to check into the *E-mail address to check* box and click **Check .**

Step 4: If the test result is "E-mail address" TipsMake.vn@gmail.com "exists" is the real email.

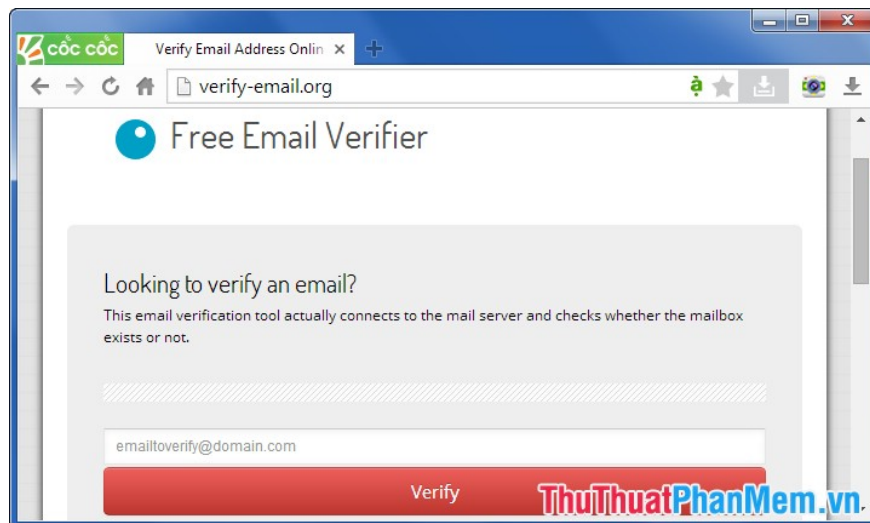

If the result is "E-mail address" TipsMakem.vn@gmail "does not exist" is a fake email.

Free Email Verifier <http://verify-email.org/>

Step 1: Access website verify-email.org.

Step 2: Enter the email address to check in the text box next to **Verify** then click **Verify** .

Step 3: Check the results.

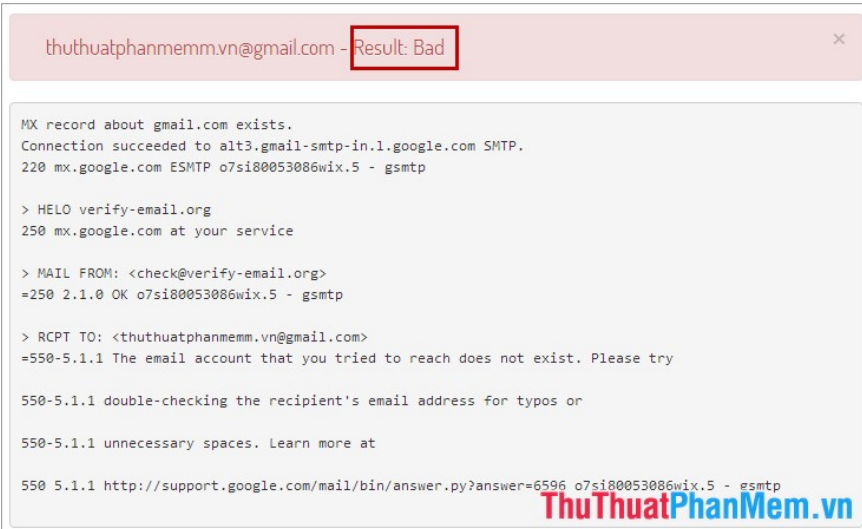

If the result is **OK**, then email is real email.

```
