Do you want to upgrade this version to experience but still wonder if iOS 12 beta developer has improved speed compared to iOS 11.4? For answers, follow experimental videos that compare iOS 12 beta and iOS 11.4 speeds on iPhone streams from 5S to 8 of YouTube channel iAppleBytes below.

iPhone 5S is the oldest iPhone that can be updated to iOS 12. Compared to iOS 11.4, iOS 12 is not only the start-up process but also the speed of opening apps, opening the keyboard, and surfing the web.

For other new iPhone models 6, 6s, 7, and 8 only have iOS 12 boot time slower than iOS 11.4 and most of the tasks are faster. The benchmark score on iPhone 6 iOS 12 is lower than iOS 11.4 but the remaining models give higher scores.

After testing, iAppleBytes came to the conclusion that iOS 12 beta is one of the fastest and smoothest Beta he ever tested.

You can now download and install iOS 12 beta to experience.
