

# Check out iOS 13 beta 1 with iOS 12.3.1, the speed is twice as fast as Apple introduced?

In order to compare the difference in operating speed between iOS 13 beta 1 with iOS 12.3.1, recently YouTube channel iAppleBytes has conducted some basic tests to help users have general reviews before decide to update your device.

Apple has released the iOS 13 beta 1 update with an introduction to significant high performance improvements. In order to compare the difference in operating speed between iOS 13 beta 1 with iOS 12.3.1, recently YouTube channel iAppleBytes has conducted some basic tests to help users have general reviews before decide to update your device. Please consult.

YouTube channel iAppleBytes uses high-end devices including iPhone 6S, iPhone 7 and iPhone 8 with the same tests as the previous videos. In order to give the most accurate results, the equipment in the test is used in parallel with the ideal (room temperature) operating environment.

Test results show that the speed between the two versions is significantly different. On iOS 13 beta 1, basic operations such as opening the default app, browsing the web, playing games, running the background . until advanced testing with some supporting software such as 3D Mark, AnTuTu, Geekbench 4 majority all give better results than iOS 12.3.1.

**iOS 12.3.1** Geekbench 4 (point) 3D Mark (point) AnTuTu (point) iPhone 6S
