

# Check out the new enhancements added on Galaxy Watch and Watch Active

Galaxy Watch and Galaxy Watch Active users will be able to experience many exciting new features.

Samsung has just announced that it will bring some unique new features that are only available on Galaxy Watch Active 2 to the previous generation products like Galaxy Watch and Galaxy Watch Active. With this update, Galaxy Watch and Galaxy Watch Active users will be able to experience additional advanced customizations, new Samsung Health features and better support for Bixby, specifically as follows:

1. Users can use Bixby Voice to start an exercise routine, find the difference in travel time between locations and easily control their SmartThings ecosystem. As an AI virtual assistant, Bixby will know how to learn your habits and become more useful over time. A number of new language option packs will also be added, including English - English, French, German, Italian and Spanish.
2. Improvements to the user interface, My Style feature first appeared on Galaxy Watch and Galaxy Watch Active.
3. The icon of the active application is moved to the bottom area of the watch face, making it easy for users to track and quickly access any applications that are running in the background, such as call logs, messages. the message.
4. Improved layout in the general control panel, allowing users to customize icons more easily and quickly.
5. Graphical user interface improved in more detail, improved user interaction, along with the appearance of a series of new emoji options.
6. For Galaxy Watch Active users, the new Touch Bezel interface will be included in the upgrade, allowing you to navigate by swiping your finger around the edge.
7. Users can now track their exercise plans and goals through the Daily Active feature.
8. Heart rate alert feature first appeared on Galaxy Watch.

Samsung has begun rolling out a new update today, November 20, and will complete the update for all Galaxy Watch and Galaxy Watch Active devices in the coming weeks.
