

Check the speed of network download, upload using Speed ??Test

The following article details how to Check download / upload speed by Speed ??Test. No need to install any additional software, just have an Internet connection, you can completely check the network speed.

You are recommended by the service provider for high-speed network access packages for computers. But when using the speed is not as expected and true to the advertising of the service provider. The following article details how to Check download / upload speed by Speed ??Test.

No need to install any additional software, just have an Internet connection, you can completely check the network speed.

Step 1: Visit the website: <http://www.speedtest.net/>. Click **BEGIN TEST** . To ensure the speed measurement process results correctly, no program is downloading or downloading documents.

Step 2: Speed ??testing process **DOWNLOAD SPEED** (speed of downloading data from the network to your computer).

Step 3: The process of testing the speed of uploading data files (the speed you upload data from a computer to the network). You can check this process again by clicking **TEST AGAIN**.

Results after the second Test:

For high accuracy you should Test several times and take the average value. Thus only a small operation you have verified network speed with the service provider.

Good luck!
