

Chinese companies simulate the exact Martian environment right in the Gobi desert

Recently, about 100 Chinese teenagers have excitedly completed a 5-hour excursion to a unique 'cosmic landmark' that exists right on the earth. It turned out to be an area built and mimicked just like the one on Mars.

Recently, about 100 Chinese teenagers have excitedly completed a 5-hour excursion to a unique 'cosmic landmark' that exists right on the earth. It turned out to be an area built and mimicked just like the Mars environment, located in the Gobi desert, China - Asia's largest desert.

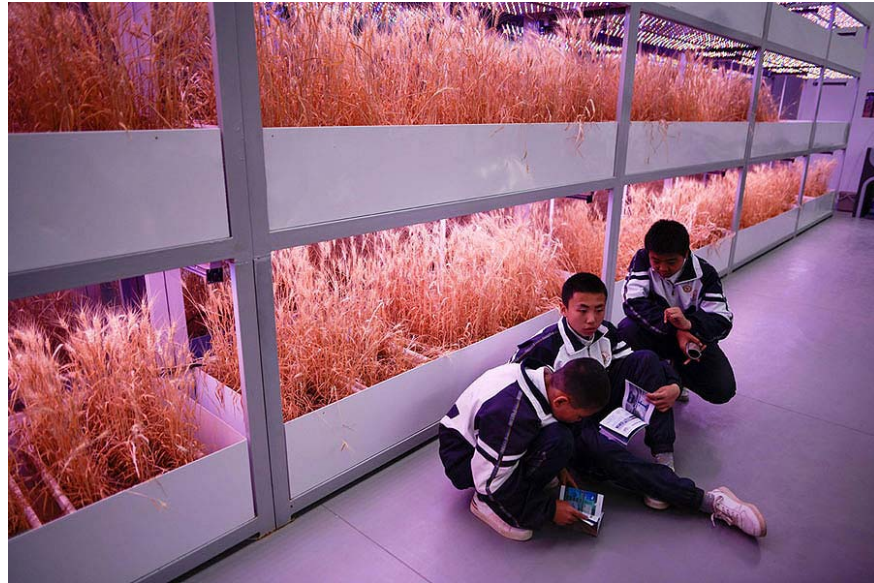

Don't be mistaken, this is not exactly a studio or setting taken in the 'Star Wars' blockbuster, which is actually a unique tourism complex built by a Chinese company. right in the windy hills of Gansu Province.

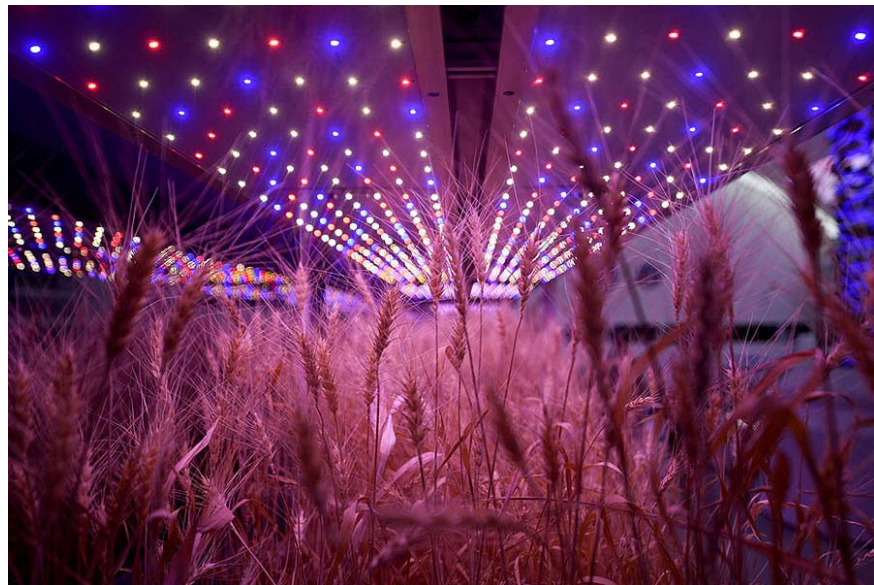

This Mars simulator is called Mars Base 1 Camp, located about 40 km from the central town of Kim Xuong with a relatively small area, only about one fifth of the area of a football field. Mars Base 1 Camp is a brainchild of a media company and local officials in Gansu, a poor province located in the northwest of the world's most populous country.

Local officials hope that the arrival of Mars Base 1 Camp will help promote tourism by making visitors feel as if they are traveling on the red planet, thereby contributing to improving people's lives. people here.

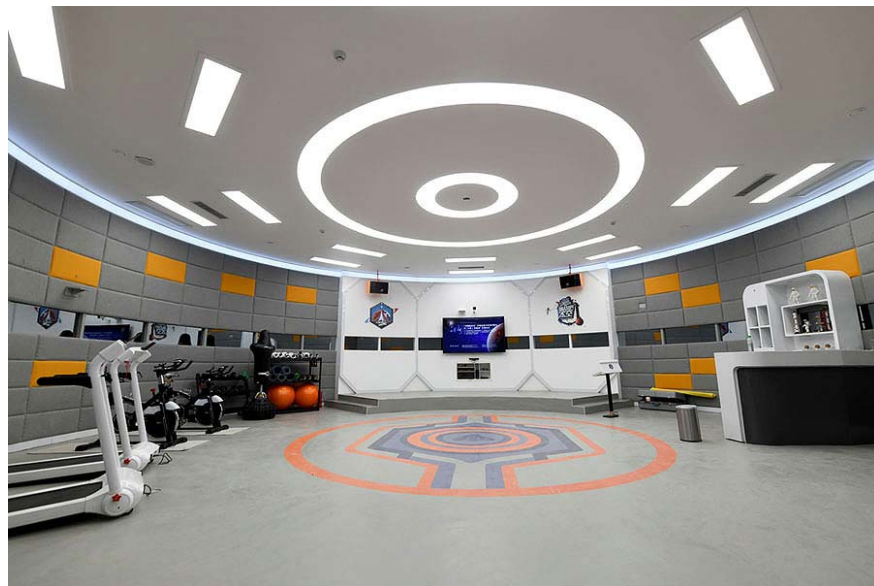

In addition to becoming a tourist attraction, Mars Base 1 Camp management also plans to partner with the China Aerospace Travel Center (ACC) to turn the complex into a digging center. Create astronauts of international standards in the near future.

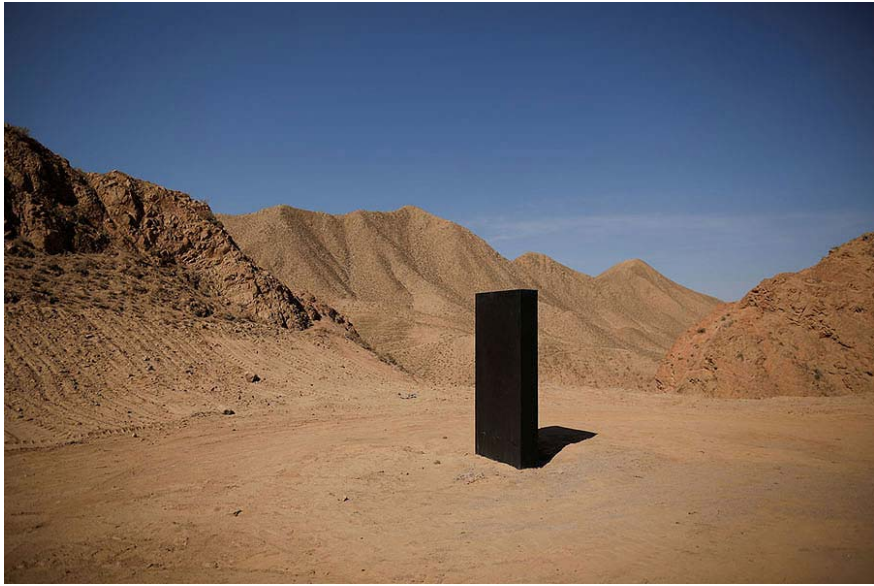

Please admire some more pictures of this unique tourist area:

Summer tourist season is coming. If you get bored with crowded, crowded beaches, try to consider new and unique tourist destinations like Mars Base 1 Camp, surely you will not be disappointed!
