

Chinese hybrid cars run 2,100km on just one tank of gas

The Fulwin T10, a plug-in hybrid SUV from Chery, has set a new Guinness record for the longest distance traveled by a plug-in hybrid SUV with a full fuel tank and battery, when running 2,100km without charging. or refuel.

Specifically, on July 17, the Fulwin T10 departed from Shangri-La and 3 days later arrived at Zhuhai, 2,100km away. The above distance surpasses the previous record of 300km.

With this record, Chery Fulwin T10 can make the journey "across Vietnam" from the North Pole to the South Pole (2,500km long according to data from Google maps) without only needing to refuel once.

Chery Fulwin T10 is located in the mid-large SUV segment, 4,850mm long, 1,930mm wide, 1,712mm high and has a wheelbase of 2,820mm. The car has 2 configurations of 5 and 7 seats.

Chery Fulwin T10 is equipped with a hybrid powertrain combining a 1.5L turbocharged engine with multiple electric motors for a total capacity of 610 horsepower, 960Nm of torque for the 2-wheel drive version and 375 horsepower/610Nm for the single version. bridge. The car has a 34.46 kWh battery that can travel up to 200km if operating purely on electricity. The single-wheel drive version has a fuel consumption of 5.75 liters/100km, while the 2-wheel drive version has a fuel consumption of 6.8 liters/100km.

The Chery Fulwin T10 interior is designed with a minimalist dashboard with 2 screens in the same frame creating a total screen of 24.6 inches. The largest screen is the HUD screen using augmented reality technology 50 inches in front.
