GSM Arena said Google has just released a trial version for the latest Chrome 26 browser. Chrome's dictionary system in this version has been updated. The new browser has additional support for languages such as Korean, Tamil and Albanian.

Besides, the new "Ask Google for suggestions" error checking feature on Chrome also supports both grammar, homonym and spelling in sensitive context written in English. Chrome 26 error checking technology is also being applied on the Google Search search engine.

Currently, Google has just released Chrome 26 Beta for Windows XP, Vista, 7 and 8 operating systems. OS X users must wait a while longer.
