

Chrome Flag Browser + exceeded 11 million downloads

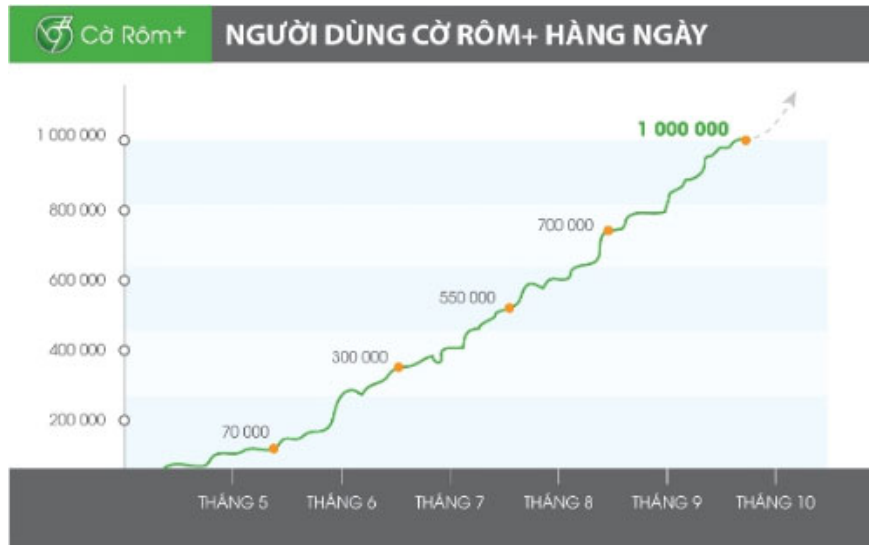

The Vietnamese Chrome Flag Browser + has just reached 11 million downloads, and updated the new interface and launched an automatic spell check feature.

The Vietnamese Chrome Flag Browser + has just reached 11 million downloads, and updated the new interface and launched an automatic spell check feature.

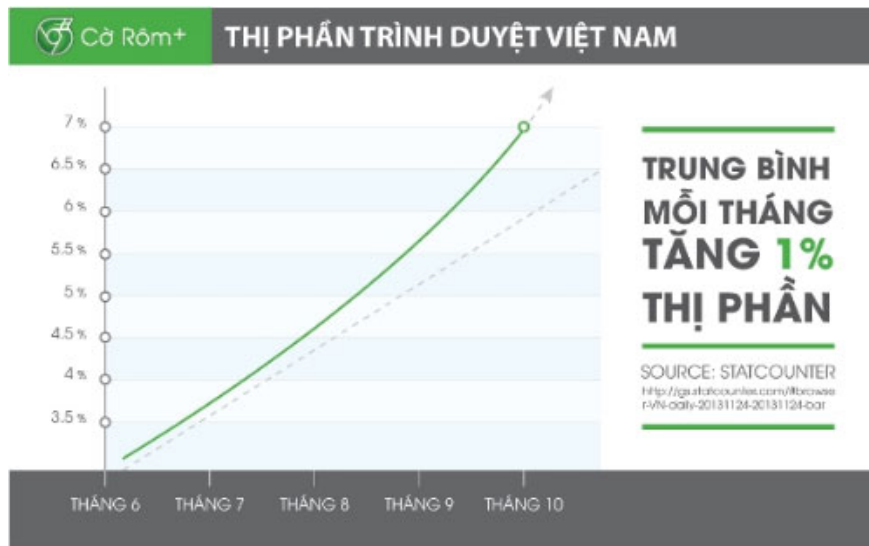

Chrome + is a product developed by Vietnamese engineers at Coc Coc. At the time of launch, many members of the online community judged it to be a risky move for young engineers when Chrome Flag + had to compete with Google Chrome, Firefox and Internet Explorer, and foreign browsers are now in line Vietnam market value.

However, just six months after its launch, the browser has more than 11 million downloads with more than 1 million regular users every day and 3.6 million users a month.

Currently Chrome Flag + has achieved 6.41% market share of Vietnam browser market according to data from StatCounter. On average, Chrome Flag each month gains more than 1% of the market share

Chrome + is well received by Vietnamese users by providing many useful features such as the ability to access Facebook with every operator, download video and movie files from sharing sites such as YouTube, speed of downloading files like IDM, self Add a bookmark . Most recently, this browser has added a useful spell checker.

Experience the features of the Chrome Flag browser + here.
