

Chromium browser with Microsoft Edge has a new extension store

This website contains many extensions belonging to different topics and has a similar way of operating as Chrome Store or website that provides utilities for Opera.

Currently, the development of the Microsoft Edge browser based on the Chromium kernel in the shortest possible time is Microsoft's top target. One of the tech giant's efforts to accomplish that goal is to build a website that lists the extensions (extensions) available to the Edge browser.

This website contains many extensions belonging to different topics and has a similar way of operating as Chrome Store or website that provides utilities for Opera. To download extensions on this website, users just need to click the Get button in each specific extension page.

The themes in the extension store for Microsoft are quite popular Chromium Edge including ad blocking and password management, shopping, education, performance, and some programmers' utilities.

1. Microsoft Edge Insider Addons

Although Microsoft Edge still supports all extensions developed for Google Chrome and posted on the extension store, it will have a separate extension repository with recommended add-ons for users when installing this new browser.

This extension store for this Chromium Microsoft Edge will not work with the current Microsoft Edge browser.

Hopefully, Microsoft's Microsoft Edge Chromium will cost less RAM and allow users to access with all the useful features in Chrome browser.
