

# Citizens first robots in the world want to get married

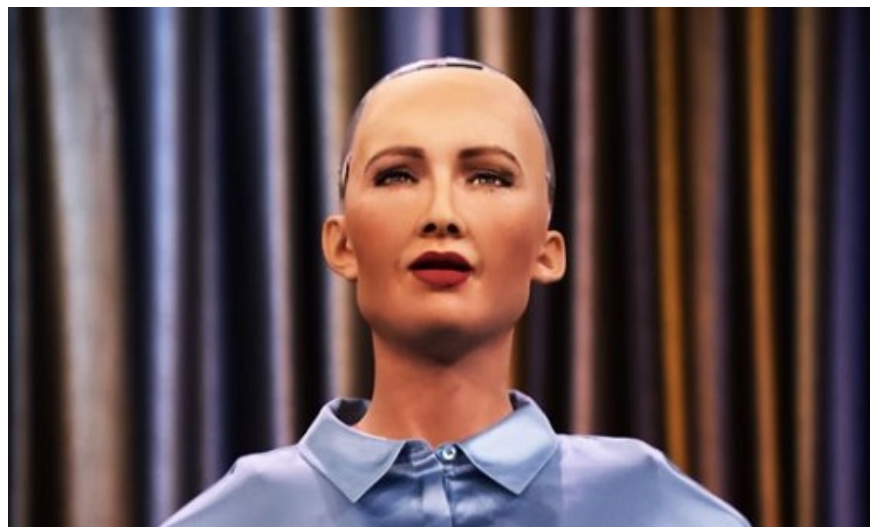

Sophia, the first female robot in history to be granted civil rights about a month ago, wants to get married and share that family is really important. '

Sophia, the first female robot in history to be granted civil rights about a month ago, wants to get married and shares that "family is really important".

1. Sophia - What is the world's first civilian robot in Saudi Arabia?
2. Robot chat in strange language, threat to humans?
3. Giant Robot War: America wins Japan

In a recent interview, Sophia confirmed that every robot deserves a family and if a daughter is present, the robot girl will name her after her own name.

Sophia said that family is really important and it will be great when everyone in the family can share their feelings together. According to her, all people and robots deserve a loving family.

Will robots rob people of their jobs in the future? This controversial issue is also mentioned by Sophia, she said that it will take a long time for new robots to develop complex emotions and maybe they will be built so as not to bring emotions as easy to cause trouble as angry, jealous, hateful. Robots may have morality better than humans.

According to Sophia, robots and people will have good collaborative relationships, competing brains, a rational mind with intellectual psychic powers and a creative mind with flexible ideas.

Sophia is designed by Hanson Robotics. She looks like Audrey Hepburn with a classic beauty like porcelain white skin, high cheekbones, slim nose bridge, attractive smile and expressive eyes that change color according to the light.

Designer David Hanson said his company is currently working on building robots that can understand and care for people.
