Dell notebooks are not only "oddly" (9,99 mm) but also have a design and opening that is unlike any other in the market.

Users will slide their fingers over the heat sensor strip to open the device. Adamo XPS will be released in November, using Windows 7 operating system, integrated Intel ULV power-saving chip instead of Intel Atom as in Sony Vaio X.

Dell's representative handed the Adamo XPS to a Microsoft representative at the launch of Windows 7 operating system.

The Dell Adamo XPS is admirably thin.

The product is opened by sweeping the finger on the touch strip.

The buttons are separate.
