According to Electronista, Vaio X will probably be equipped with touchscreen besides power-saving microprocessor and 3G mobile connection. However, the real damage will only know after Sony's official press conference to introduce this product in the coming days. At this time, at the 2009 Ceatec exhibition, Sony Vaio X is admiring viewers for its slender and glamor.

*Below are photos of Sony Vaio X at Ceatec 2009 taking place in Japan .*

Sony Vaio X is super thin, weighs 0.7 kg.

The body thickness is just the same as the VGA plug width.

Typical Chiclet keyboard.

Vaio X may be equipped with a touch screen.
