

# Cloud Desktop remote working solution officially launched

On April 6th, FPT International Telecom Company Limited (FTI) - a member of FPT Telecom Joint Stock Company (FPT Telecom) - one of the leading Internet and Cloud service providers in Vietnam. , announced the deployment of a remote working solution for Cloud Desktop businesses.

Before the outbreak of the COVID-19 pandemic disrupting production and business activities, businesses and organizations were looking for solutions to allow employees to work from home.

But deploying a remote solution, not simply bringing a laptop out of the office, many job positions have system access requirements, enterprise applications, and must be followed. comply with the organization's privacy policies. Therefore, FTI provides a companion Cloud Desktop solution and helps businesses solve risks in business activities.

Mr. Pham Duy Phuc - General Director of FPT International Telecommunications Company Limited (FTI) said: "Cloud Desktop is a remote working solution with outstanding features such as high security, reasonable cost but while ensuring the user is as easy and experienced as using a computer working at the office. Cloud Desktop is undoubtedly the optimal choice for businesses to deal with any situation. "

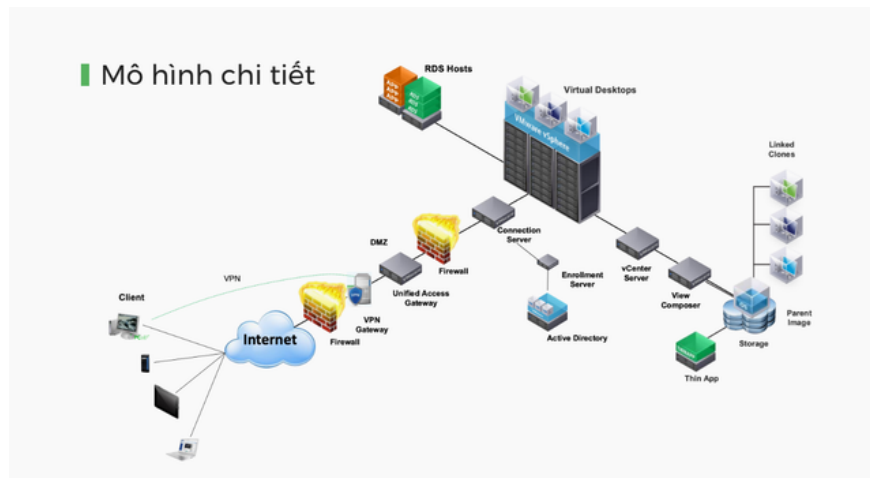

## The salient features of Cloud Desktop

**Easy access:** Cloud Desktop supports multi-platform access: laptops, smartphones, tablets . at any time and place.

**Deploying quickly, expanding flexibly:** Ready to provide services at all times, flexible upgrades according to user requirements.

**Data safety and security:** Data is stored centrally on cloud computing platform, reducing the risk of data loss, integrating multiple layers of security to ensure absolute safety data. The operation process complies with strict standards and is certified by the world's leading organizations (Tier 3 Up Time Institute, PCI DSS, ISO 50001: 2011, ISO / IEC 27017: 2015).

**Centralized management, cost savings:** Centralized management system, real-time operation and use control. Costs according to actual demand (Pay as you go). Hourly service fee and cash flow from CAPEX to OPEX.

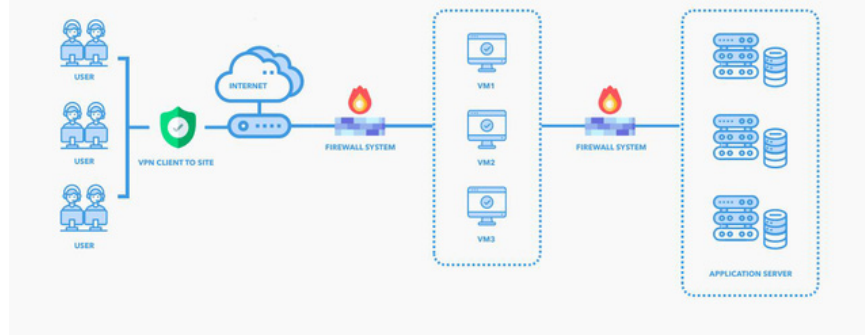

When using Cloud Desktop services, businesses receive many benefits from end users (office workers), IT administrators to businesses. Specifically, end users will experience the workspace like an office desktop. When logging into the system, they use the data, tools and resources previously licensed by the IT Administrator of the organization. Meanwhile, IT administrators are provided with a management portal, with full control to adjust virtual machine resources to gain more computing power, memory and storage for their employees. In particular, businesses can track operating costs in real time and pay according to the actual use demand "pay as you go".

### Describe a typical customer

Demand: The main work building of a company is at risk of blockade, all entry / exit activities are prohibited for a long time while the company operation still needs to be maintained with 5000 employees. The company's applications do not allow access by RDP or TeamViewer LIVE from the outside.

### Cloud Desktop solution provided

## Giải pháp của FTI Cloud Desktop

Remote users, use VPN Client to Site to access the network containing virtual machines at FPT Data Center.
