

Coc Coc adds dictionary lookup feature when surfing the web

Coc Coc web browser has just been improved, adding features to look up English - Vietnamese dictionary by double clicking on the word to be checked while browsing.

Coc Coc web browser has just been improved, adding features to look up English - Vietnamese dictionary by double clicking on the word to be checked while browsing.

Users who just click on English words on Coc Coc browser can know what this word means in Vietnamese.

Accordingly, users of Coc Coc browser in the process of surfing the web and want to know a word (*English*) means that just using the mouse to double-click on the word to look up, immediately a gray frame opens including What is the pronunciation, word type and meaning of the word in Vietnamese will be listed in detail.

With this feature, searching words and reading English will be more convenient, helping users not need to install separate dictionary software.

Reportedly, Coc Coc browser is a product developed on *Chromium* open source platform and uses the design interface entirely in Vietnamese. Another highlight of this browser is the ability to automatically add Vietnamese accents at any location on the Internet when users type unsigned text.

Currently, users can download the latest version of Coc Coc browser **here!**
