

Code of chart/bar graph with error combination

The example below illustrates a bar chart template with errors created with JavaScript.

The margin of error/error plot gives you a glimpse of the margin of error and confidence. Error graph combined with bar chart will form error bar chart.

The example below illustrates a **bar chart template with errors created with JavaScript** . As you can see, this chart type supports animation, zoom, rotate, events, export as an image, and is cross-browser compatible. The article also provides the source code for you to edit in the browser or save to your computer to run locally.

Code bi?u ??/?? th? thanh k?t h?p sai s?

Source : CanvasJS

Chart customization

You are free to edit this chart as you like by changing the properties. For example:

1. `linkedDataSeriesIndex`: Link an error series to another data series in the chart.
2. `stemColor`: Body color.
3. `whiskerThickness`: Extreme point thickness.
4. `Color`: Color.
