

Collection of multi-touch screen laptops

Toshiba has just become the latest production company to launch a laptop equipped with multitouch screens

Toshiba has just become the latest production company to launch a laptop equipped with multitouch screens .

Previously, HP, Lenovo and some other companies also introduced similar products but the price of this line is still quite high. Touch screen laptops are not new, but because of the lack of hardware and operating system support, they only account for a very small part of the market.

However, Jennifer Colgrove, director of display technology at DisplaySearch, said 2010 will be the year of touch computers because Windows 7 not only brings stability, high productivity but also universal operating system. The first variable supports multi-touch, boosting the share of touch notebooks, increasing from 2-3% currently to 10% in 2015.

Latest product **Toshiba Satellite U500-1EX** has 13.3 inch multi-touch screen 1,280 x 800 pixels, Core i3-330 2.13 GHz, 4 GB DDR3 RAM, 320 GB hard drive, standard Wi-Fi connection n, Bluetooth 2.1, HDMI, USB, eSATA, optical drive, webcam, card reader and price of about 1,100 USD.
