

ColorOS 6 was officially released, improving the user interface, enhancing the performance of PUBG

Yesterday, OPPO officially launched the ColorOS 6 operating system with many improvements for users at an event taking place in Chengdu, China.

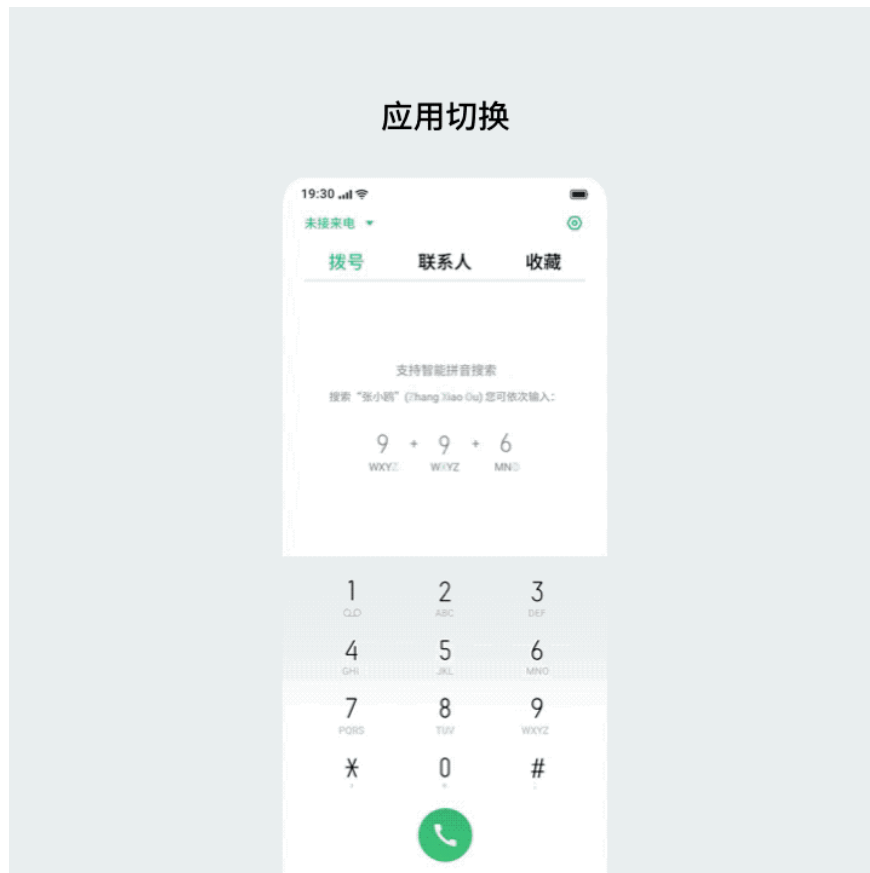

Yesterday, OPPO officially launched the ColorOS 6 operating system with many improvements for users at an event taking place in Chengdu, China.

ColorOS 6 is designed with gentle white tones that are dominant, without borders, reducing icon size . In this event, OPPO also introduced a new logo of ColorOS.

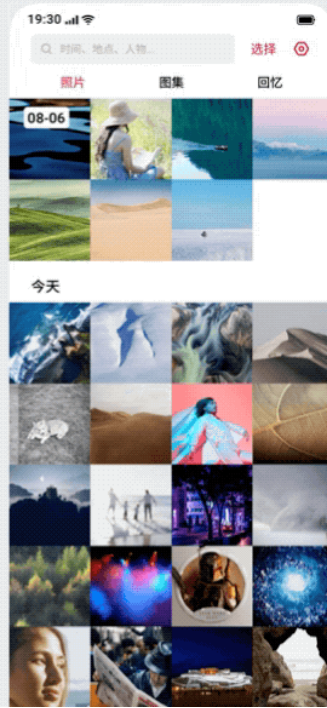

OPPO has made over 3500 motion effects to improve the animation effect in ColorOS6, making it smoother and more efficient to use.
