Combine the best private browser for your phone

1. DuckDuckGo

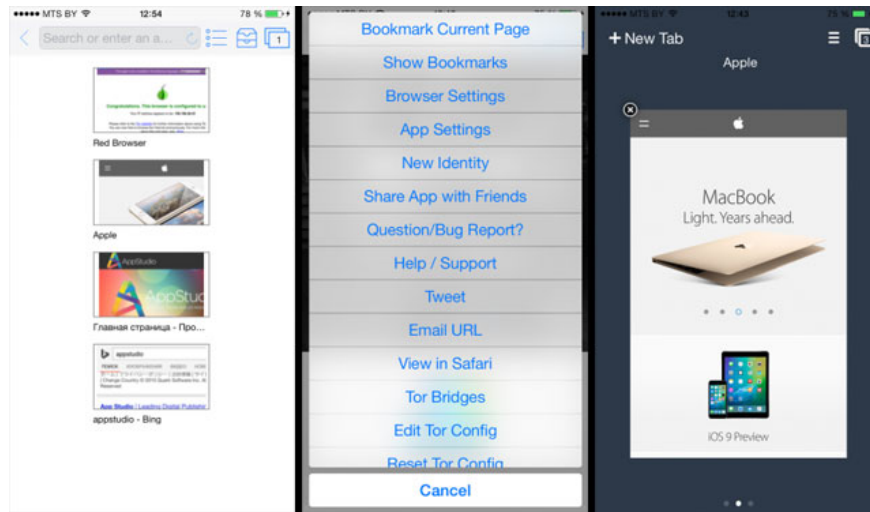

1. Download DuckDuckGo for iOS
2. Download DuckDuckGo for Android

Let's start with DuckDuckGo, this is an Internet search engine with the main ability to protect the searcher's privacy and avoid personal search results. In addition, DuckDuckGo automatically blocks all third-party cookies to keep you safe from ad networks, forcing websites to use encrypted connections.

You will also find a private layer with each site, at each site you visit will have a level of security based on the rating and scoring from A to F next to the website address. The F level is the lowest level and if you see the access site showing this level, it is an unsafe warning. Thereby you can decide whether to access that domain or not.

2. Red Onion

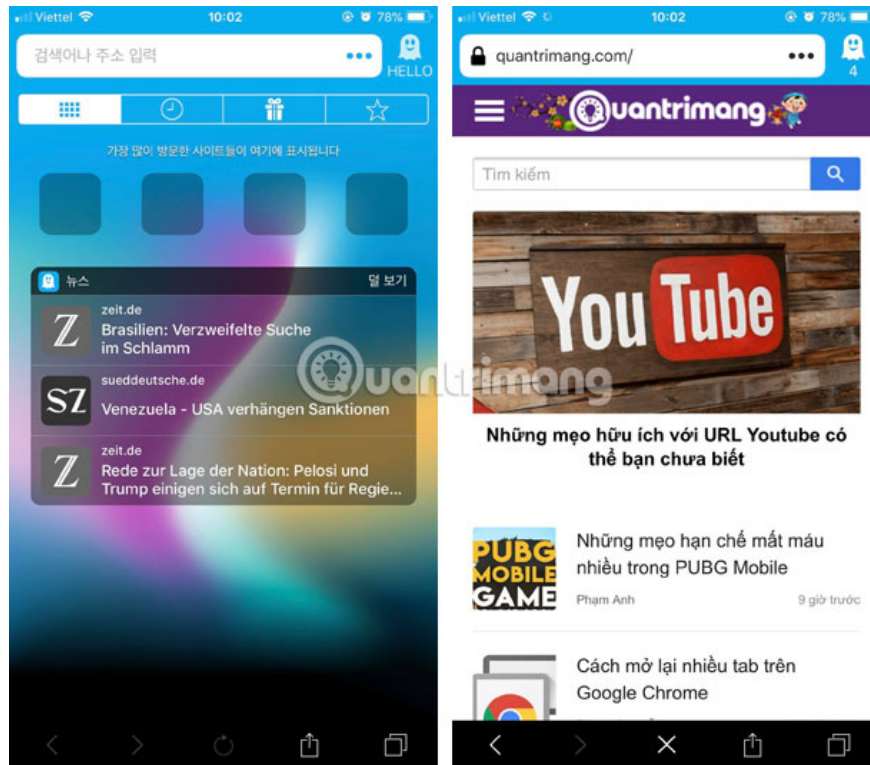

Download Red Onion for iOS

This is an anonymous browser that allows you to access the Internet safely and privately, without leaving any trace. With Red Onion, you not only overcome public, corporate or school Internet Wifi filters and secure web access.

In addition, you can freely download undisclosed identity or IP address. When browsing the internet using a Tor-based browser, your information is run through the onion network, so tracking information will not happen.

If you own an iPhone or iPad, you should check the Red Onion, which allows you to access the entire website even when blocked on the network. Red Onion will reset all your browsing data when you restart the browser. Other features on the browser include encryption key, support for extracting audio from MP4 to MP3 and IPTV support through streams and M3U8 playlists.

3. Ghostery Privacy Browser

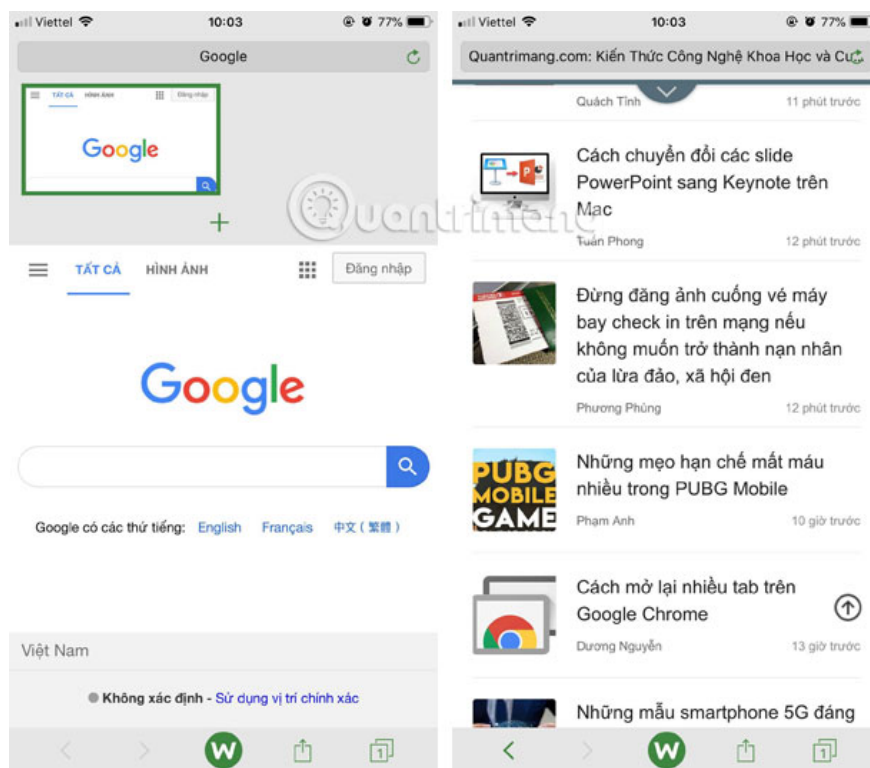

1. Download Ghostery Privacy Browser for iOS
2. Download Ghostery Privacy Browser for Android

Ghostery's capacity is only **21.1 MB** , quite light compared to the above two browsers. Users can experience the Ghostery browser gently, at high speed and without leaving any trace. Because this browser will help you identify sites that collect user data and browse unlimited web without worrying about leaking personal information when you browse the web.

In addition, Ghostery is a Chrome extension and Firefox supports users to protect their privacy, manage ad networks, remove junk codes from the site and speed up the browsing experience. Use Wap's smart blocking technology to flag dangerous websites and have Ghost mode to block all external personal data.

4. Webroot SecureWeb Browser

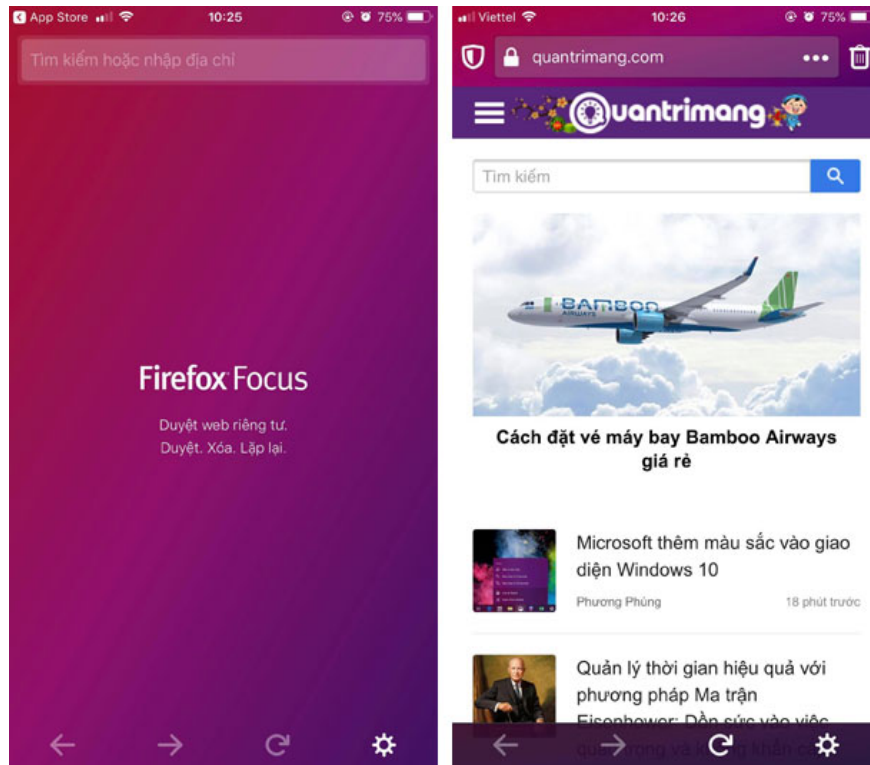

1. Download Webroot SecureWeb Browser for iOS
2. Download Webroot SecureWeb Browser for Android

SecureWeb Browser is a highly secure web browser, with a user base of more than 30 million worldwide, so you can see how this browser provides personal information security. SecureWeb Browser will protect you with advanced antivirus technologies. It includes real-time protection against malicious websites thanks to Webroot's database and password management on your device.

SecureWeb Browser interface is quite intuitive, you can easily use it even when the browser has no instructions. It directly opens the home page for users to navigate online through multiple tabs arranged below the address bar. The options are below the icons to the right of the screen.

In addition, the browser also provides you with three popular search tools: Google, Yahoo and Bing. And like many other browsers, it also allows users to delete history, cache and reset the application to its original state.

5. Firefox Focus

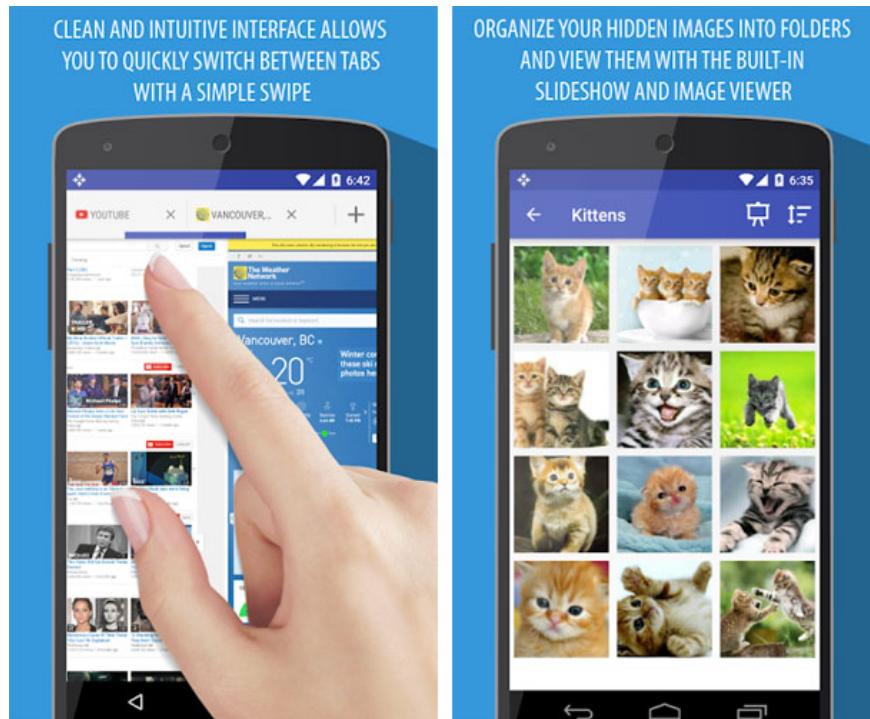

1. Download Firefox Focus for iOS
2. Download Firefox Focus for Android

If you like an option from more reputable brands, you can choose Firefox Focus, which is another version of Mozilla Firefox. Thanks to the Mozilla Firefox brand, Firefox Focus immediately became one of the most popular browsers on both mobile platforms.

Firefox Focus will not save your password and it does not accept cookies or trackers. The ad blocking tool will help Firefox Focus provide faster page load times than most regular browsers like regular Mozilla Firefox or Google Chrome versions.

With a capacity of only 22MB, Firefox Focus does not take up a lot of device space and will be a fast, secure and reliable mobile browser on your smartphone.

6. Frost

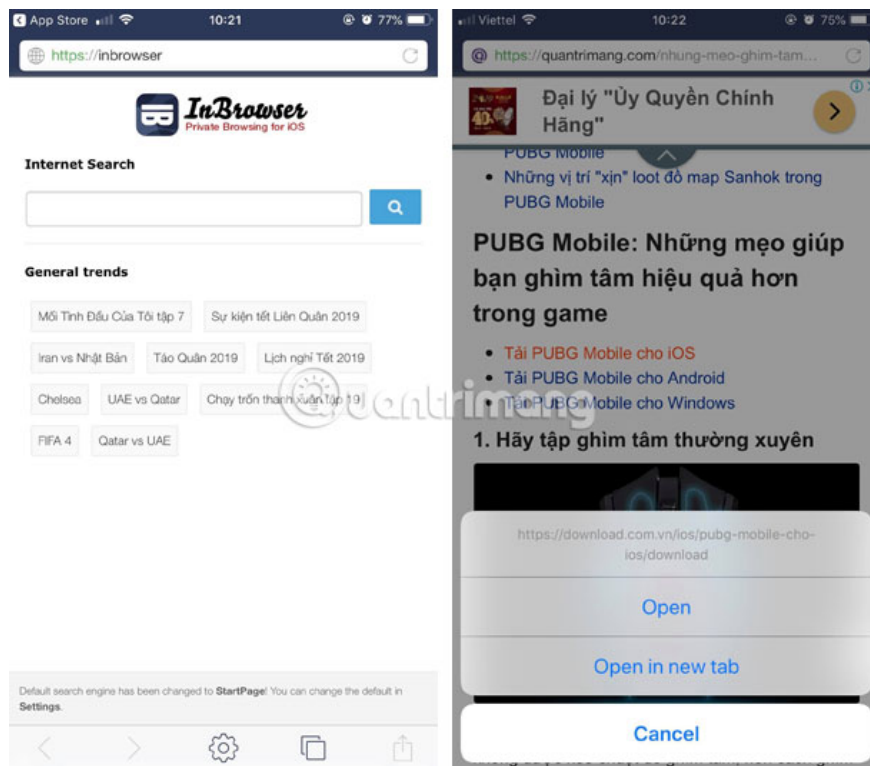

Download Frost for Android

Frost is the personal mobile web browser, it can help users browse the web with "black" websites, dating sites, online shopping, use banking services, save photos or bookmark secretly complete. all. Images and bookmarks are hidden and password protected.
