

# Comment tag in HTML

The comment tag is used to insert comments and comments in the code.

## Definition and usage

**Comment tags** used to insert comments and comments in the code. These comments will not be displayed on the browser.

Using comments next to the code makes it easy to understand, control and fix errors for your work more quickly and conveniently. This tag is especially useful if you have lots of code and long code.

## Browser support

There is no difference of this tag between HTML 4.01 and HTML5.

## Structure

Structure a comment in an HTML file:

**Note** : There is an exclamation point (!) In the opening tag, but not in the closing tag.

## For example

TipsMake.com

Knowledge - Experience - FAQ

Results returned:

```
TipsMake.com  
Ki?n th?c -Kinh nghi?m - H?i ?áp
```
