

Common myths about 4G networks

We are too familiar with the 4G network phrase when network operators officially cover the users. However, not everyone has the right views about 4G services, let's review the confusion about 4G that many people still believe through the article below.

We are too familiar with the 4G network phrase when network operators officially cover the users. According to statistics of Viettel network, about 10% of mobile subscribers in Vietnam switched to using 4G networks. However, not all of us have the right views about 4G services. From the perception of 4G networks in high and remote areas, there is no 4G or 4G faster than 3G, to assume that phones do not support 4G are the most common misunderstandings about 4G that we use goods. day. Let's review the confusion about 4G that many people still believe through the article below.

1. Things to know about 4G networks
2. What is the difference between 4G and 4G networks?
3. Learn about 5G network, future mobile platform

The 4G network is not much faster than 3G

It is difficult to quantify Internet speed, because basic needs such as surfing Facebook, reading newspapers, watching online movies, . are very hard to perceive. But if a user is a fan of online shopping, playing games, etc., he / she will feel the value of the network speed more pronounced, especially when you buy cheap airline tickets or hunt for discounts on websites. foreign.

A plus point in 4G is highly appreciated by technology people, which is fast, stable connection and improved smartphone performance. As a result, the device has less battery life, and users don't always have to worry about finding a charger or a backup battery pack. The above two factors will directly affect the decision of 4G technology choice of technology. Accordingly, any network with a 4G network is widespread, modern coverage technology is preferred.

The 4G network is high

Many people may not pay attention, but now all operators allow users to choose different packages for 4G services, ranging from 60 VND / MB to 90,000 VND / 3GB. Depending on your needs, you can choose the package according to the daily unit price or pay the monthly fee. As an example, if you choose Viettel's Mimax4G plan, users only pay 3,000 VND / day or 30 VND / MB.

So what about the 4G network compared to the 3G service that the operators are providing? Contrary to popular belief, 4G has a much cheaper price. For example at Viettel, when comparing Mimax 3G package (70,000 VND to 600MB) with Mimax4G package (90,000 VND with 3GB high speed), is 4G 4 times cheaper than 3G?

The price of 4G services in Vietnam is even softer when compared to other countries in the region. It is known that overseas users have to spend more than 1 million to buy 4G sim. Also in Vietnam, the SIM changer 4G is taking place completely free.

Phone does not support 4G

The common myth that some people often communicate is that the phone does not support 4G. They think that instead of losing new phone bills to use 4G, it is more loyal to 3G. Because of this thought, many people still say no to 4G, 4G reality is too old for the world, it is only popular in Vietnam. Most genuine machines and laptops now support 4G. The devices are quite cheap so 4G is not as expensive as you think.

1. How to know if your smartphone supports 4G?

Remote areas probably don't have 4G networks

Along with the thought of 4G is a "luxury" service, so many people think that it is not supportive when returning home. But with 4G Viettel network, only for 6 months, almost this network has completed the nationwide network, to both remote, border, island areas. Other networks have also been covered in many provinces. 4G integration has helped people to access knowledge on the Internet equally (something that previous technologies like Wimax, 3G have not done yet). In particular, 4G is an indispensable service in every ph??t travel journey in remote areas. 4G network does a good job of searching maps, addresses of restaurants, hotels, livestream on Facebook, . thanks to healthy waves.
