

Compaq Presario CQ new line

This HP product line is built on the Centrino 2 platform, meeting office and entertainment needs well.

This HP product line is built on the Centrino 2 platform, meeting office and entertainment needs well. The machines of the new series are beautifully shaped with sunken lines with contemporary beauty.

Newly launched Presario CQ series in Vietnam include 3 models CQ45, CQ20 and CQ60 suitable for all needs.

Powerful Compaq Presario CQ45 with energy-efficient 45 nm CPU technology , with the latest Intel GM45 Chipset generation. Graphics card Intel Graphic Media Accelerator 4,500 MHD ensures excess graphics processing capability. The device is equipped with HDMI and eSATA ports that support fast data exchange. In addition, Expansion Port III extends the wide area connection via docking with peripheral devices, so users will have more interconnects to connect with entertainment devices.

This machine has a modern design. Case made from liquid - metallic material with submerged circles is very different from other models.
