

Compare Bluehost and GoDaddy

Whether you are a beginner or looking to move your site to another place, Bluehost vs GoDaddy is definitely one of the top choices.

Whether you are a beginner or looking to move your site to another place, Bluehost and GoDaddy are definitely one of the top choices.

Both GoDaddy and Bluehost are top names and it is not easy to choose one of these two providers.

That's why today's article compares Bluehost and GoDaddy to help readers answer the question: Which service is better?

Bluehost or GoDaddy is web hosting service suitable for you?

1. What is Bluehost?
2. What is GoDaddy?
3. Compare features of Bluehost and GoDaddy
 1. GoDaddy outperforms Bluehost in performance
 2. GoDaddy is cheap, Bluehost is cheaper
 3. Compare the security features of Bluehost and GoDaddy
 4. Bluehost is better at helping customers
4. Bluehost or GoDaddy is the winner?

What is Bluehost?

Bluehost is one of the largest web hosting service providers in the industry. Moreover, this is one of the few services proposed by WordPress - the largest content management software today.

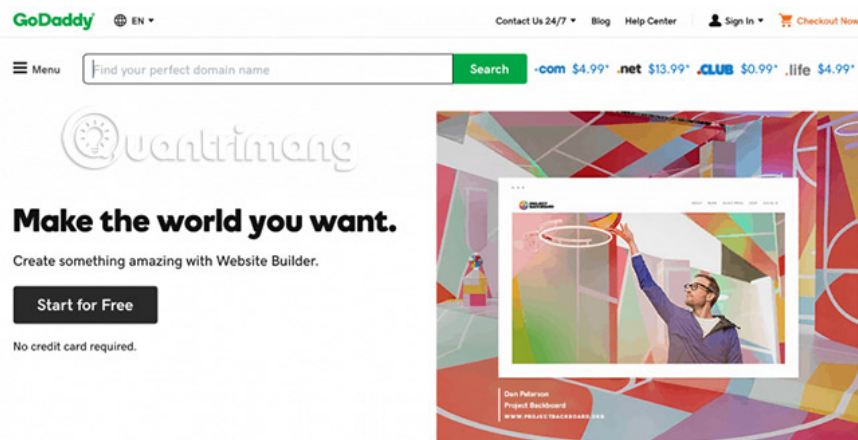

Bluehost provides shared packages, WordPress, VPS and dedicated hosting packages. Bluehost claims to offer the best quality at an affordable price.

What is GoDaddy?

In fact, GoDaddy is the largest hosting service provider at this time.

GoDaddy offers a number of shared services, WordPress, VPS and hosting dedicated exclusively for Linux and Windows. GoDaddy also sells domains and has packages for email archiving, marketing and website building. Refer to the article: What is GoDaddy? For more details.

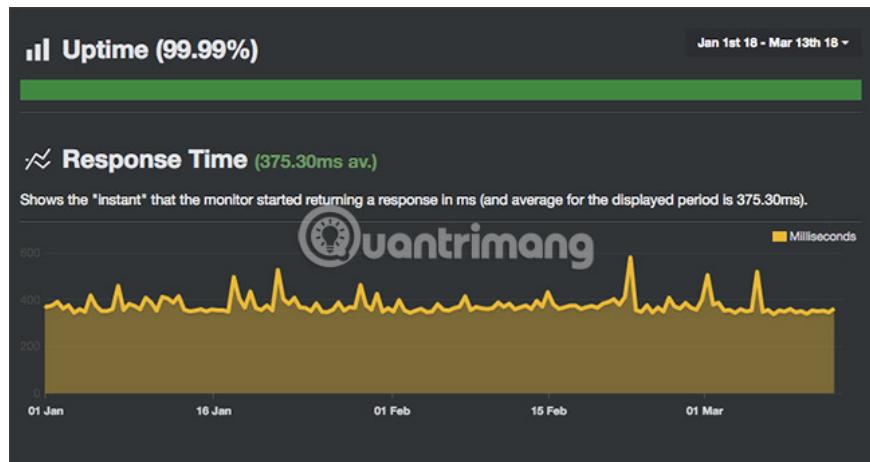

Compare features of Bluehost and GoDaddy

Both Bluehost and GoDaddy have some proud features. The article compares performance, price, security features and support to see what is the better option.

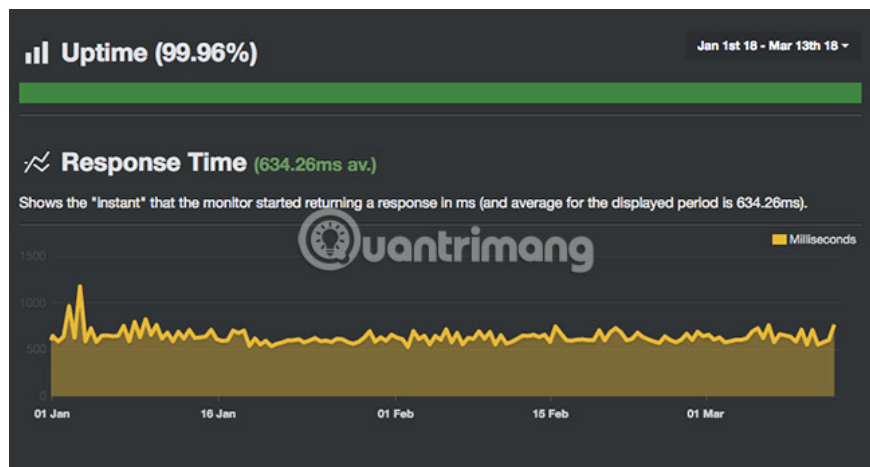

GoDaddy outperforms Bluehost in performance

Both GoDaddy and Bluehost promise uptime of up to 99.9% and excellent server speed.

However, GoDaddy's performance is better than Bluehost. During testing, GoDaddy averaged 99.99% uptime (better than the firm's guarantee). GoDaddy's server response time is also excellent - averaging 375 milliseconds, slightly slower than blinking (200 milliseconds) and much better than the industry average of 553 milliseconds. seconds.

Bluehost's results are slightly worse, with 99.96% uptime (still better than guaranteed by Bluehost) and response time is slower, 634 milliseconds.

Performance is one of the important things to consider when choosing a host. So in this case, GoDaddy wins in both categories, response time and better uptime.

GoDaddy is cheap, Bluehost is cheaper

Both services compete very hard on price. GoDaddy's price starts at \$ 5.99 (138,000 VND) / month and Bluehost drops to a lower rate, at \$ 2.95 (VND 69,000) / month. In addition, both often offer discounts to make more impressive impressions to users.

But what you get is important.

With Bluehost's cheapest package starting at \$ 2.95 / month, you have 1 website, 1 domain registration, 50GB storage capacity, SSL certificate and unlimited bandwidth.

Basic	Plus	Choice Plus	Pro
\$2.95/mo*	\$5.45/mo*	\$5.45/mo*	\$13.95/mo*
Normally \$7.99	Normally \$10.99	Normally \$14.99	Normally \$23.99
Select	Select	Select	Select
1 Website	Unlimited Websites	Unlimited Websites	Unlimited Websites
50 GB SSD Storage	Unlimited SSD Storage	Unlimited SSD Storage	Unlimited SSD Storage
Unmetered Bandwidth	Unmetered Bandwidth	Unmetered Bandwidth	Unmetered Bandwidth
Free SSL Certificate	Free SSL Certificate	Free SSL Certificate	Free SSL Certificate
Standard Performance	Standard Performance	Standard Performance	High Performance
1 Included Domain	Unlimited Domains	Unlimited Domains	Unlimited Domains
5 Parked Domains	Unlimited Parked Domains	Unlimited Parked Domains	Unlimited Parked Domains
25 Sub Domains	Unlimited Sub Domains	Unlimited Sub Domains	Unlimited Sub Domains

GoDaddy package for \$ 5.99 / month will give you 1 site, 1 domain, 100GB storage and unlimited bandwidth. Unfortunately, you have to pay additional fees for SSL certificates.

Economy	Deluxe	Ultimate	Maximum
Basic resources for starter sites.	More space and flexibility for multiple sites.	More power for complex sites and heavy traffic.	Supports multiple complex sites with high-res photos and video.
As low as \$5.99/mo	As low as \$7.99/mo	As low as \$12.99/mo	As low as \$19.99/mo

\$7.99/mo when you renew ⁴	\$10.99/mo when you renew ⁴	\$16.99/mo when you renew ⁴	\$24.99/mo when you renew ⁴
Add to Cart	Add to Cart	Add to Cart	Add to Cart
Award-winning, 24/7 support	Economy features, plus	Deluxe features, plus	Ultimate features, plus
1 website	Unlimited websites ⁹⁹	2x processing power & memory	2x more power and memory
100 GB storage	Unlimited storage	Free SSL Certificate - 1 year ¹¹	2x Maximum site traffic
Unmetered bandwidth	Unlimited subdomains	Free Premium DNS	Free SSL Certificate for the full term
Free Business Email - 1st year		Unlimited databases	

One more thing to discuss is, after the first milestone, both Bluehost and GoDaddy prices have increased.

Bluehost increased from \$ 2.95 / month to \$ 7.99 (VND 186,000) / month. GoDaddy also increased from \$ 5.99 / month to \$ 7.99 / month.

But when it comes to total cost, Bluehost is still the winner because you get the first price very cheap.

Compare the security features of Bluehost and GoDaddy

Bluehost includes Cloudflare content delivery network (CDN) with all of its packages to ensure uptime, help website load faster and safer. Bluehost also includes free SSL certificates.

GoDaddy protects and monitors each hosted website, away from DDoS attacks. You have to pay for other things.

The automatic daily backup feature on both GoDaddy and Bluehost is priced at \$ 2.99 (VND 69,000) / month. However, if you choose GoDaddy, you need to buy an SSL certificate for \$ 6.67 (155,000 VND) per month, while Bluehost and many other providers offer this service for free.

Bluehost's additional security features cost \$ 1.99 (VND 46,000) per month while GoDaddy sells them for \$ 5.59 (VND 140,000) per month.

SiteLock

Defend your websites against attacks and malware by detecting and fixing vulnerabilities and threats before they cause problems.

CodeGuard

CodeGuard works behind the scenes taking daily backups and saving each as a separate version - making it easy to turn back the clock should disaster strike.

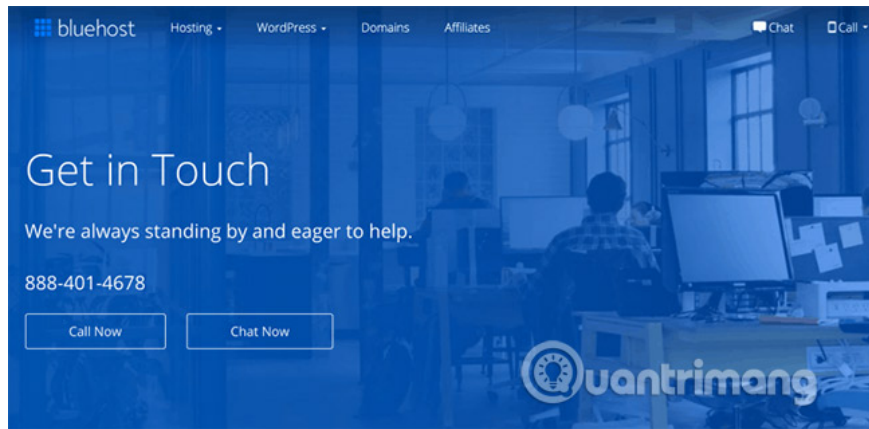

Spam Protection

Powered by Google, Postini filters out harmful and unwanted content before it reaches your inbox, isolating quarantined messages for you to review.

In general, both Bluehost and GoDaddy are secure. However, Bluehost wins in this category because it includes SSL and CDN to protect your website. GoDaddy provides security features, not only for more expensive prices, but also for essential SSL certificates.

Bluehost is better at helping customers

Support is one of the reasons why WordPress is not afraid to introduce Bluehost to users. The provider has support 24/7 via phone, chat and feedback for immediate support.

Not only that, Bluehost also hired and trained agents (agents) to help troubleshoot. Bluehost's support team is always polite and friendly.

GoDaddy, on the other hand, doesn't stand out very much in terms of support. Although there are also 24/7 phone and chat support options, the response time is not as fast as Bluehost.

Hours: All Day Mon - Fri

You will also often hear the answer "I have to ask my manager" (I have to ask my manager) from GoDaddy.

Both of these hosting services have great support options. But Bluehost is faster and more useful than GoDaddy.

Bluehost or GoDaddy is the winner?

Bluehost is the clear winner when compared to GoDaddy. This provider is more affordable and includes more features. Bluehost support is also much better than GoDaddy.

On the other hand, GoDaddy wins when it comes to performance. And that is one of the main features to consider.

After all, you won't regret choosing one of these two services. Both GoDaddy and Bluehost offer high quality services. And that's why GoDaddy and Bluehost are among the leading services in this area.

Wish you find the right choice!
