

Compare editions of Windows 10 Home, Pro, Enterprise, Education

You want to upgrade Windows 10 operating system without knowing which version to choose for your computer. The following article will go over the versions of Windows 10 Home, Pro, Enterprise, and Education to help you choose the most accurate one.

You are trying to upgrade the operating system to Win 10 version and wondered whether to choose the appropriate version for your computer. The following article will go over **the versions of Windows 10 Home, Pro, Enterprise, and Education** to help you choose the most accurate one.

Firstly, the article goes to find out the most common characteristics about the Windows 10 versions:

1. Window 10 Home

- Price range is about \$ 119, is the lowest version of **Windows 10**. Windows 10 Home is designed for a single user such as running on PCs, tablets, 2-in-1 computers. It has some limited features for users, for example, **Windows 10 Home** does not support setting up a computer network according to **Domain**.

2. Window 10 Pro

- Price ranges from \$ 199, has full features of **Windows 10 Home** and is supported with additional enterprise support features. Therefore, **Window 10 Pro** is suitable for businesses and organizations. If you are installing the **Windows 10 Home version**, Microsoft supports the upgrade to **Windows 10 Pro version**.

3. Window 10 Enterprise

- **Window 10 Enterprise** is a more advanced version than **Window 10 Pro** for businesses . It has the features of the **Pro** version and adds more advanced features, especially it has many features to support businesses operating in the **IT** field.

4. Window 10 Education

- **Window 10 Education** is a version specifically for education industry, designed and installed for computers in schools, is a higher version than the **Pro** version and almost equivalent to the **Enterprise** version .

Below is a comparison of the features of **Windows 10 versions: Home, Pro, Enterprise, Education.**
