1. Distinguish power subwoofer and subwoofer slightly

Before learning about power sub, steam sub, let us define what subwoofer is. In a sound system, the subwoofer is responsible for reproducing low frequencies or bass sounds (frequencies from 20 - 200 HZ), helping to enhance the bass, resulting in a powerful and vibrant sound effect. dynamic. A good subwoofer can produce warm sounds, deep bass and thick.

The subwoofer is basically divided into steam sub and power sub:

Steam subwoofer

The woofer is used in conjunction with the audio system and requires a built-in amplifier to power the speaker. Therefore, the subwoofer and amplifier selected must have the right capacity to match to ensure the bass is emitted round and firm.

Combining the bass and amp speakers together requires a lot of technique. If you're not an audio savvy, it's hard to connect them correctly, resulting in reduced sound quality as well as distortion.

Based on the number of feet, the subwoofer is slightly divided into several categories, such as the sub-3-inch steam, the sub-foot 4-inch steam, the sub-sub 5-inch steam, etc. .

Power subwoofer

Unlike the sub, the electric subwoofer has built-in amplifier function. Therefore, when choosing this subwoofer type, we will not need to connect it with amplifiers or other intermediate devices to output signals. Thanks to the outstanding advantages, many subwoofers are used by many people to listen to music, sing karaoke at home or for business purposes. Electric woofers are also divided into several categories according to the number of subwoofers like 4 inch electric sub, 5 inch electric sub, .

Power subwoofer

2. Should buy subwoofer or subwoofer slightly?

Both the power subwoofer and the sub subwoofer have the typical function of a bass speaker: reproducing low frequency sound. So, which is the better sub-power and sub sub?

In fact, it is difficult to judge which is better because they all have their own advantages and disadvantages. Power subwoofer connected simply, saving installation costs but the sound quality is not comparable with the subwoofer slightly. Therefore, those who want to buy music sub-speakers, sing karaoke at home with low cost should choose electric subwoofers. Conversely, if you are investing in a professional sound system and you have a good knowledge of sound, then subwoofers will be a great choice.

3. Suggest some models of subwoofers and subwoofers that sound good, cheap
