

Compare the speed and battery life of iOS 14 Beta 1 with iOS 13.5.1

Recently iAppleBytes, a YouTube channel comparing speed and battery life of iPhone through iOS versions, has released a video comparing speed and battery life of iOS 14 Beta 1 with iOS 13.5.1.

Recently iAppleBytes, a YouTube channel comparing speed and battery life of iPhone through iOS versions, has released a video comparing speed and battery life of iOS 14 Beta 1 with iOS 13.5.1.

To get the results, iAppleBytes performed speed comparisons on devices including iPhone SE iPhone 6S, iPhone 7, iPhone 8 and iPhone XR with basic word tests like performing a number of operations on the application. The default, until advanced, is to use the dedicated support application Geekbench 4.

Below is a video comparing the speed and battery life of iOS 14 Beta 1 with iOS 13.5.1, please follow along to be able to review an overview of the speed, battery life of iOS 14 Beta 1 before proceeding. update offline.

Speed ??Test iOS 14 Beta 1 and iOS 13.5.1

From the video we see, the majority of older iPhone models from SE to XR run on iOS 14 Beta 1 on applications slower than when running on iOS 13.5.1. iOS 14 is still in development and iOS 14 Beta 1 is not yet an official version so we shouldn't expect too much speed improvement for iPhone models.

Battery Test iOS 14 Beta 1 and iOS 13.5.1

For the battery life test, the iAppleBytes channel used the Geekbench 4 app and performed on iPhone SE 2020 and iPhone 11. The results were surprising when the battery life of iOS 14 Beta 1 improved over iOS 13.5.1. As follows:

iPhone SE 2020, when running on iOS 13.5.1 scored a score of 2506 points, a bit lower than running on iOS 14 Beta 1 with 2512 points.

iPhone 11, when running on iOS 13.5.1 reached 3630 points, and increased to 3988 points after testing on iOS 14 Beta 1.
