

Compare the speed between iOS 12 beta 1 and iOS 12 beta 8 on iPhone 6S

Recently, Apple released iOS 12 beta 8. After having released 7 previous beta versions, will this 8th beat, iOS 12's performance be improved on iPhone and iPad?

Recently, Apple released iOS 12 beta 8. After having released 7 previous beta versions, will this 8th beat, iOS 12's performance be improved on iPhone and iPad?

IApplBytEs Youtube account has performed a speed test between iOS 12 beta 8 and iOS 12 beta 1 so users can make a decision whether to upgrade or not.

The device chosen for use in this speed test is an iPhone 6S.

The results showed that when running the latest beta version of iOS 12, iPhone 6S started up nearly 9 seconds faster than the first beta. Compared to the application opening speed, there is no difference between the two versions.

In short, with the iOS 12 version the devices are significantly improved in speed and performance. Therefore, this is a worthwhile version for users to expect and update their device when officially released in the near future.
