You are wondering what selection of surveillance equipment is suitable for your car? **Vietmap and Webvision cameras** , which brand is better? Let Quantrimang answer your questions in the following article.

Should choose Vietmap or Webvision camera?

1. Vietmap action camera
2. Webvision journey camera
3. Conclusion

1. Vietmap action camera

Vietmap is one of the famous camera brands with affordable products, good quality with many advanced features. The advantages of the Vietmap brand family of video recorder equipment include:

Integrating navigation software, Vietmap S1 directions

One of the strengths of the Vietmap itinerary compared to other brands providing similar products on the market is the ability to navigate, navigate through software developed by the company: **Vietmap S1** .

Vietmap is proud to affirm that its navigation software can cover the transportation system in 63 provinces and cities nationwide, has the data of 2.5 million home addresses and is updated every 3 months to support. best support the driver's travel needs.

Voice traffic warning via Vietnamese language

In addition to the built-in navigation software in the device, Vietmap dashcam cameras are capable of reading signs and giving traffic alerts in Vietnamese (ADAS Technology). This helps drivers easily grasp what is happening on the road and participate in traffic in a legal way.

The language on Vietmap's travel devices is also shown in Vietnamese. Drivers can use the camera easily and conveniently without spending too much time getting used to the device.

Connect devices easily to your phone via Wifi, Bluetooth

Vietmap has built-in Wifi, Bluetooth transceiver on camera device. This helps the company's products can easily connect with other digital devices such as smartphones, tablets to directly view images from the camera; track

previously recorded video files and monitor cars from a distance.

Some Vietmap travel devices also support reversing cameras, such as Vietmap A50, Vietmap C62 and Vietmap C65 that allow users to observe the whole scene of the traffic before and after right on the vehicle. The high-end products also integrate 3G reception (such as the Vietmap iDVR P1 rearview mirror), which helps drivers to listen to music and entertainment right in the car, making their driving experience become Interesting and less boring.

Equipped with advanced technology

Vietmap's reverse camera products have supported Full HD, 2K, 4K video recording that can output videos with realistic, vivid and sharp images.

Some of the advanced technologies available in Vietmap's camera products include:

1. WDR helps to fight backlit when driving at night or in backlit conditions.
2. G-Sensor helps automatically activate the device when a car is struck with strong external force.

3. Loop recording helps the camera automatically overwrite the latest data into memory, avoiding missing out on any traffic.
4. The screen shows the intelligent camera image with front and back camera devices (throttle on R number, automatically shows the reverse camera, throttle on N number, the image from the front-view dash camera pops up automatically).

Vietnam brand high quality, genuine warranty

Vietmap is a high-quality Vietnam camera brand. When buying the product, users are not only satisfied with the quality of the product has been verified, but also assured because Vietmap network of genuine branches and agents nationwide. When the product has a problem, you can easily go to one of hundreds of equipment supply locations across the country for warranty support and repair.

Affordable price, excellent quality

The price of Vietmap camera products is considered to be cheaper than similar products. However, the quality of Vietmap recording devices is still guaranteed, even better by some of the exclusive features (such as directions map, voice traffic alerts, .).

Although the devices still have some limitations such as: Camera can be hot when continuous operation, the outside design of the camera is not really outstanding, GPS transceiver is still in a separate form, Vietmap camera is still It is the ideal choice for drivers who wish to equip a journey recorder with many features, intuitive interface and nationwide warranty system.

2. Webvision journey camera

Besides Vietmap, another choice of travel equipment that makes drivers have to think hard is Webvision camera. What are the features of this brand? What are the advantages of Webvision dashcam? Let's explore with Quantrimang:

Navitel navigation map copyright on camera

Built-in tracking devices, Navitel map is considered as a guideline for drivers who do not have much experience on the road. With complex algorithms, updated every 3 months on roads covering 63 provinces and cities, drivers will no longer have to worry about getting lost or wrong.

Command the camera by voice

Some high-end camera devices of Webvision also integrate the function of receiving voice control commands (via virtual assistant Hana). Now, you can focus 100% on driving while still disinterestedly turning on and off the features on the camera easily and conveniently.

Remote camera tracking via CarAssist application

Whether you're parking at a great distance, renting or renting your car, you can locate your car via the CarAssist app that connects the device directly to your mobile phone.

When your car shows signs of theft, smashing, Webvision dashcam will automatically capture and send images to you instantly. This feature is currently available on some of its product lines such as Webvision A69, Webvision N93, .

However, some disadvantages of Webvision Dashcam include: The price of camera is higher than similar products of the same quality, Webvision is currently only a genuine distributor but has not set up an official office. in Vietnam (customers may experience some difficulties during the warranty period).
