

Compare Vsmart Joy 3 4GB and Samsung Galaxy A10s

Vsmart Joy 3 has just added the option of 4 GB RAM + 64 GB ROM with a slightly increased price compared to the 3/32 GB version. Try comparing this model to the Galaxy A10s, to see if it deserves to be the king of the 2-3 million segment?

If in the low-price segment in the Vietnamese market, the young VinSmart brand of Vingroup is now beginning to win the hearts of Vietnamese consumers, then the "giants" in the technology village such as Samsung, OPPO. It is difficult to find a firm foothold in this segment, partly because of the "Vietnamese people use Vietnamese goods" mentality of the majority of consumers today.

Basically, VinSmart is "fighting" the low / mid-range segment with a series of new product lines that are extremely affordable to Vietnamese users. The Vsmart Joy 3 just launched not too long ago has received a lot of attention from users, even so much that VinSmart has to add a 4GB RAM option for the Joy 3, turning This smartphone becomes even more "delicious" than the price of the machine.

In the segment where Vsmart Joy 3 is standing firm, there are few smartphones with the same price but superior to the Joy 3. If considering the price segment of just over 3 million VND, the representative of Samsung is Galaxy A10s , which is also very popular in this price segment, will be the main rival of Vsmart Joy 3 4GB. So where is the smartphone worthy for users?

Performance factor

In the budget / mid-range segment, the main factor that most users consider buying in a smartphone is in terms of performance. Users can completely trade in other design or camera factors to buy a smartphone with good performance.

And this is the "playground" of Vsmart, when Vsmart Joy 3 has to say the impressive performance in the price range of only around 3 million VND. If on the other side, Samsung only equips its Galaxy A10s with MediaTek Helio P22 chip with 2GB RAM and 32GB ROM, then with Vsmart Joy 3, it is equipped with Snapdragon 632 chip, 4GB RAM and 64GB ROM. double.

Vsmart Joy 3 is equipped with Snapdragon 632 chip

Needless to say, everyone knows that Vietnamese users prefer Qualcomm chips over MediaTek chips, simply because in the same price range, Snapdragon always gives better and more stable performance than chips. by MediaTek. Not to mention Joy 3 also has double the A10s memory.

Tested playing popular games such as Lien Quan Mobile, PUBG Mobile at medium graphics settings, Joy 3 handled smoothly, there was almost no lag or lag, even more detailed scenes. . Meanwhile on Galaxy A10s, users need to lower the setting to minimum, the device still does not handle well in scenes of fire or 'combat'. The mid-range processor on a low-cost device has done its job perfectly - enhancing the gaming and 3D entertainment experience to everyone.

Galaxy A10s is the trump card of Samsung in the smartphone segment priced at over 3 million

Camera

If users are willing to accept "sacrificing" the camera quality is not good to get a superior performance on the low-cost product line, VinSmart is proving the opposite, users absolutely have can own a smartphone that has both strong performance and beautiful camera features.

Vsmart Joy 3 has up to 3 main cameras on the back including a 13MP wide-angle camera, an 8MP ultra wide-angle camera and a 2MP depth-measuring camera that supports portraits. Compared to rival Galaxy A10S, it is clear that Joy 3 is dominant in terms of camera, because A10s only equipped with dual 13MP + 2MP camera clusters, lack of ultra wide-angle camera. Not to mention Joy 3 has more shooting modes, especially professional shooting mode that allows manual adjustment of almost all parameters.

The image quality of the Galaxy A10s is quite good for the price.

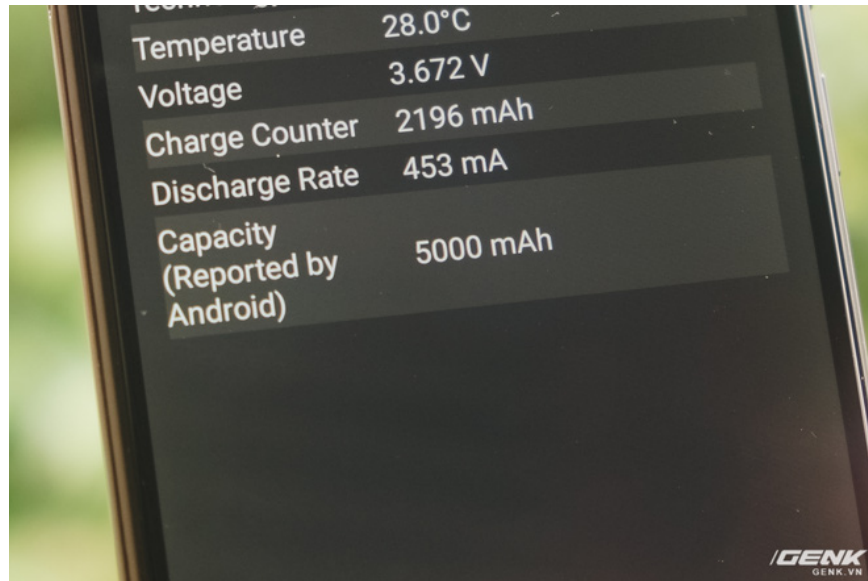

Experience shooting on Vsmart Joy 3, with 3 cameras, also brings a difference in flexibility. The presence of ultra-wide angle camera makes it easy to capture majestic natural scenes, tall buildings without having to stand too far away. A little more creative, wide-angle camera can help female subjects become taller, longer legs thanks to the angle from close up.

. but only dual cameras

Battery life

If you think the 4000mAh battery on the Galaxy A10S is too "buff" then you might be surprised to know that Vsmart Joy 3 has even more 5000mAh battery, even has Quick Charge 3.0 built in. . It can be seen that this is a remarkable device of Vietnamese brand smartphone compared to other competitors in the same price range.

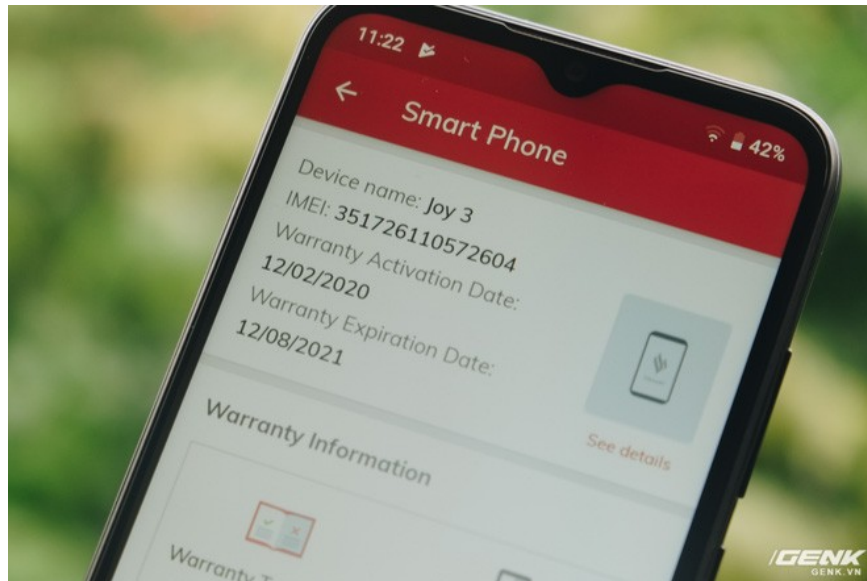

The 5000mAh battery supports both fast charging and Quick Charge 3.0

Another small point that also makes users excited is the modern USB Type-C charging port on the Joy 3, instead of the micro USB port of the Galaxy A10s.

Brand elements, software and warranty

Perhaps this is the only factor that Vsmart Joy 3 loses compared to the Galaxy A10s. VinSmart brand is just over 1 year old, can not be compared to the "big" Samsung in the technology village so familiar to Vietnamese users.

However, that is why we are seeing the daily efforts of VinSmart. Starting with low-cost devices, then the warranty period of 18 months, one for one 101 days while most other products only have 12 months warranty, including Galaxy A10s. , or even constantly updating software for Vsmart machines to add more new features.

Vsmart phones have a warranty period of up to 18 months

In terms of software alone, Vsmart made a lot of effort when it was about to release a large VOS 3.0 update to consumers, and Joy 3 is one of the smartphones that support continuous and long-term updates. .

VOS operating system on Vsmart phones

The most important is the selling price

Vsmart Joy 3 offers a wide range of choices for customers with 3 different versions, priced from 2.29 to 3.29 million different versions of RAM while its competitor only has a 2GB RAM version and again with a higher selling price of up to 3.69 million.

Speaking of which, maybe we all have the answer about choosing Vsmart Joy 3 or Galaxy A10s would be more reasonable. Vsmart Joy 3 stands out from the competition in the smartphone world and that is why it is the best-selling product of the segment recently, as recorded by retailers.

	Vsmart Joy 3 4GB/64GB	Galaxy A10s
Màn hình	LCD IPS 6.5 inch HD+	PLS TFT 6.2 inch HD+
CPU	Qualcomm Snapdragon 632	MediaTek Helio P22
