

Comparing the battery life of iPhone on iOS 11.3.1 and iOS 11.4, after upgrading the battery is wasted?

YouTube channel iAppleBytes has conducted battery testing between iOS 11.3.1 and iOS 11.4 on iPhone lives from 5s to 8 to check if the battery is lost after the update.

Apple recently officially released iOS 11.4 for users to download and update. Although iOS 11.4 has added many new features, bringing a better experience to users, many people have not yet released this new version because there is still a lot of battery life after updating.

To answer this question, iAppleBytes YouTube Channel conducted battery testing between iOS 11.3.1 and iOS 11.4 on iPhone lives from 5s to 8. The Plus versions were not selected because these versions already have quite good batteries .

All devices selected by iAppleBytes have fairly new batteries and do not enable performance stabilization.

First, all the machines are in iOS 11.3.1 and tested with the Battery Test program until the battery runs out. Next, they are updated all to iOS 11.4 and run again.

iOS 11.3.1

- iPhone 5s: 3h01p điểm benchmark pin 1296
- iPhone 6: 3h04p điểm benchmark pin 1547
- iPhone 6s: 3h05p điểm benchmark pin 1850
- iPhone 7: 3h35p điểm benchmark pin 2145
- iPhone 8: 3h38p điểm benchmark pin 2178

iOS 11.4

- iPhone 5S: 3h05p điểm benchmark pin 1296
- iPhone 6: 3h39p điểm benchmark pin 1596
- iPhone 6s: 3h35p điểm benchmark pin 2150
- iPhone 7: 4h09p điểm benchmark pin 2486
- iPhone 8: 4h03 điểm benchmark pin 2430

The results of the test showed that iOS 11.4 offers much better battery life than iOS 11.3.1. From iPhone 6 and above, the new iOS version provides up to nearly half an hour of usage.
