Detailed step-by-step instructions

1. **Step 1:** Log in to the Roblox platform and search for the keyword "Anime Final Quests" to enter the game.
2. **Step 2:** On the home screen, find the settings gear icon or the blue bird icon located in the bottom left corner of the screen.
3. **Step 3:** A new window will appear with a blank box containing text such as "Enter Code" or "Insert Code Here".

- Step 4:** Click and paste the Anime Final Quests code that you copied from the list above into this box.

Why am I failing to enter the Anime Final Quest code?

If you receive an "Invalid Code" message, please check for the following common errors:

- Incorrect characters:** Codes often contain a combination of uppercase and lowercase letters and numbers, or special characters. For example, FreeGems is completely different from freegems.
- Extra spaces:** Sometimes when copying, you accidentally add a space at the beginning or end of the code. Please double-check the string of characters.
- The code has expired:** This is the most common reason. The publisher may disable the code at any time without prior notice.
- Level Requirement:** Some special Anime Final Quests codes require the character to reach a certain level before they can be used.
