

CONCATENATE function (string concatenation function) in Excel

Use the CONCATENATE function when you want to concatenate existing text strings into a single, complete text string. For the syntax and usage of the CONCATENATE function, follow the article below.

Use the CONCATENATE function when you want to concatenate existing text strings into a single, complete text string. For the syntax and usage of the CONCATENATE function, follow the article below.

The article describes the syntax, how to use the CONCATENATE function in Excel.

Description

The CONCATENATE function is used to concatenate multiple strings into a single string.

Syntax

= CONCATENTE (text1, text2 .)

Inside:

- **text1: the first** string to connect.
- **text2:** is the string to connect to, up to 255 text strings to connect.

The connection string text1, text2 . can be numbers, text, or cells that refer to numbers or text, separated by commas.

Note: You can use the ampersands (&) in operators instead of CONCATENATE to concatenate strings.

For example

Concatenate text1 and text2:

= **CONCATENATE (A6, B6)**

	A	B	C	D	E	F	G
1							
2	Hàm CONCATENATE trong Excel						
3	thuthuatphanmem.vn						
4							
5	text1	text2	CONCATENATE				
6	thuthuat	phanmem	thuthuatphanmem				
7							
8	ThuThuatPhanMem.vn						
9							

Concatenate text1 and text2 with string ".vn":

= **CONCATENATE (A8, B8, ". Vn")**

	A	B	C	D	E	F	G
1							
2	Hàm CONCATENATE trong Excel						
3	thuthuatphanmem.vn						
4							
5	text1	text2	CONCATENATE				
6	thuthuat	phanmem	thuthuatphanmem				
7							
8	thuthuat	phanmem	thuthuatphanmem.vn				
9	ThuThuatPhanMem.vn						
10							

Concatenate text1 + space + text2.

= **CONCATENATE (A10, " ", B10)**

	A	B	C	D	E	F	G
1							
2	Hàm CONCATENATE trong Excel						
3	thuthuatphanmem.vn						
4							
5	text1	text2	CONCATENATE				
6	thuthuat	phanmem	thuthuatphanmem				
7							
8	thuthuat	phanmem	thuthuatphanmem.vn				
9							
10	ThuThuatPhanMem.vn		uat phanmem				
11							

With simple syntax and usage, but sometimes you will need to use the CONCATENATE function to process data on Excel spreadsheets. You can easily remember the syntax of the function to use when needed. Good luck!
