The above Pavilion laptops all use Intel's latest Ivy Bridge processor except the g4 model. In particular, dv4 and dv6 use 2.3GHz Core i7-3610QM processor, GeForce GT630M graphics, Beats audio. Both models have 14 and 15.6-inch screen sizes with resolutions up to 1,366 x 768 pixels. The dv7 uses a 2.6GHz Core i7-3720QM processor, GeForce GT 650M graphics, a 17.3-inch screen with a resolution of 1,920 x 1,080 pixels.

The Pavilion g4-2000 allows users to choose one of two Sandy Bridge Core i3-2350M and i5-2450M processors. This product uses a 14-inch screen. The G4-2000 model can be sold for about 630 USD.

The new laptop is expected to be released in April this year.
