

Configure GTA 5, configure GTA V on the computer

This is the minimum configuration and configuration required for you to choose when you build the GTA 5 configuration

GTA V, the title of the game that has been released for a long time, has not reduced the attraction of those who love open world genres in general and GTA game fans in particular. Partly because of the attractive gameplay and storyline and especially the attractive online mode with many different tasks.

Those are things that attract gamers and help players not to be bored when playing GTA 5. And as a multi-player game, it has become a popular global online game.

Although it is an online game, but GTA V's configuration is not everyone can get the highest configuration. So gamers often choose an average graphics level to experience just enough for the computer's hardware configuration. Below is the configuration for you to play GTA V smoothly on your computer

1. Smooth play configuration LOL, configure League of Legends play on the computer
2. Configure Mobile Alliance and how to choose the player
3. Configure play Warhammer: Chaosbane on the computer
4. Configure play Tom Clancy's Ghost Recon: Breakpoint

Minimum configuration GTA 5 on the computer

1. **Operating System:** Windows 10 64 Bit, Windows 8.1 64 Bit, Windows 8 64 Bit, Windows 7 64 Bit Service Pack 1, Windows Vista 64 Bit Service Pack 2 *
2. **CPU:** Intel Core 2 Quad CPU Q6600 @ 2.40GHz (4 CPUs) or AMD Phenom 9850 Quad-Core Processor (4 CPUs) @ 2.5GHz
3. **RAM capacity :** 4GB
4. **Graphics card:** NVIDIA 9800 GT 1GB / AMD HD 4870 1GB (DX 10, 10.1, 11)
5. **Free hard drive capacity:** 80GB
6. Pixel Shader: 4.0

Although GTA V was released on PC in 2015, GTA V still requires a CPU to be released in 2007. So finding a CPU to be able to "weigh" GTA 5 on a computer with at least 30FPS It must be too hard for most gamers.

With graphics card and RAM capacity is not too high requirements, you can replace the NVIDIA 9800 GT with Nvidia Geforce GTX cards or Nvidia Geforce GT DDR4 cards at a reasonable price. Or the AMD Radeon RX series, it will increase your FPS slightly.

Configuration requires GTA 5 on the computer

1. **Operating System:** Windows 10 64 Bit, Windows 8.1 64 Bit, Windows 8 64 Bit, Windows 7 64 Bit Service Pack 1, Windows Vista 64 Bit Service Pack 2 *
2. **CPU:** Intel Core i5 3470 @ 3.2GHz (4 CPUs) or AMD X8 FX-8350 @ 4GHz (8 CPUs)
3. **RAM capacity:** 8GB
4. **Graphics card:** NVIDIA GTX 660 2GB or AMD HD 7870 2GB
5. **Free hard drive capacity:** 80GB
6. Pixel Shader: 4.0

If GTA 5 required configuration, compare with other game configuration requirements. You can see the configuration to play smoothly GTA V compared to the minimum configuration of other games at the present time is not much different.

And GTA V's hardware requirements at this required configuration level are not too high. If you are looking to build a smooth PC that can play GTA V at High Settings, the price will only fluctuate from 13-14 million.

Above is the latest GTA 5 player configuration on the computer, which was released in 2013 but it was not until 2015 that GTA V launched the PC version. If you just want to experience GTA V gameplay at a medium graphics level, then you can rely on the minimum configuration level above to build a PC with a price not too high.

If you want to play GTA V at the highest graphics level, you can rely on GTA V's recommended configuration and build configurations according to your economic level.
