

Configure play Diablo 4 on the computer

Smooth play configuration Diablo 4 will not exceed the configuration of today's hot games, just a mid-range PC configuration you can play smoothly Diablo IV.

The legendary masterpiece Diablo 4 was officially announced by Blizzard after a long wait. Although there is no official launch date, we have two videos confirming that this game will be officially available to gamers in the near future.

In addition, players will have three character classes in the game including Druid (Natural Damage combined with pet), Sorceress (Magic Damage), Barbarian (Physical Damage). However, the focus in the trailer that is mentioned a lot is still three great demon lords, namely: Baal (Lord of Destroyer), Diablo (Lord of Terror), Mephisto (Lord of Hate).

And through previous gameplay videos, gamers will probably wonder if the configuration of Diablo 4 is too heavy or not. If you have a strong PC configuration today, it will not be a problem, but for gamers with a weak PC configuration, this will certainly be a problem of concern. Below is the configuration of Diablo 4 refer to the Game-Debate page.

1. Configure playing The Evil Within 2 on the computer
2. Configure Control gaming on the computer
3. Configure playing Far Cry New Dawn on the computer
4. Configure Cyberpunk 2077 on a computer

Minimum configuration Diablo 4

1. **Operating system:** Windows 7 64bit and above
2. **CPU:** Intel Core i3-560 3.3GHz or AMD Phenom II X4 805
3. **RAM memory:** 4GB
4. **Graphics Card:** NVIDIA GeForce GTX 750 Ti or AMD Radeon R7 360X
5. **Free memory:** 40GB
6. DirectX 11

Recommended Diablo 4 configuration

1. **Operating system:** Windows 7 64bit and above
2. **CPU:** Intel Core i5-4670K 3.4GHz or AMD FX-8370
3. **RAM memory:** 8GB
4. **Graphics Card:** NVIDIA GeForce GTX 1060 or AMD Radeon RX 580 8GB
5. **Free memory:** 40GB
6. DirectX 11

It can be said that configuration Diablo 4 is not too heavy if compared to many current game configurations. Gamers with a mid-range configuration can still fight Medium well with a stable FPS, which is enough to bring a satisfying experience for Diablo fans.
