

# Configure Windows Live Mail to connect to Windows Live Hotmail and MSN Mail

In case you want to recover your email from services like Windows Live Hotmail or MSN Mail, always see the following message: Windows Mail no longer supports the HTTP servers used by Hotmail and other web-based e-mail providers. The reason Microsoft made it is that HTTP is not supported on Windows Mail.

**In case you want to recover your email from services like Windows Live Hotmail or MSN Mail, always see the following message: *Windows Mail no longer supports the HTTP servers used by Hotmail and other web-based e-mail providers* . The reason Microsoft made it is that HTTP is not supported on Windows Mail.** You can only restore trial emails if you use the latest client email service called Windows Live Mail.

In this article TipsMake.com will guide you to configure Windows Live Mail to connect to Windows Live Hotmail and MSN Mail and access e-mail from your computer.

First download and install Windows Live Mail. Then activate it and go to the ' *Add an e-mail account* ' button.

Please fill in the personal information as shown below:

Add an E-mail Account

Please enter your e-mail account information below:

E-mail address: [redacted]@msn.com  
example555@hotmail.com [Get a free e-mail account](#)

Password: [redacted]

Remember password

How should your name appear in e-mail sent from this account?

Display Name: Alexandru Toma  
For example: John Smith

Manually configure server settings for e-mail account.

Next Cancel

After you have filled in all your personal information, click **Next** . In the next window, click to select the ' *Set this account as the default mail account* ' checkbox.

Add an E-mail Account

You have successfully entered in the information required to set up your account.

Set this account as the default mail account.

Finish Cancel

So from now Windows Live Mail will automatically download all your email messages.
