

# Configure World War Z on your computer

This is the standard configuration for the World War Z game on your computer, you can build according to the two minimum configurations and requirements in this article to play World War Z.

World War Z is a Co-Op-style shooter game that is attended by 4 people. Like Left 4 Dead, the player will join his teammates against large zombies with numbers up to thousands.

The World War Z configuration is considered to have the best graphics of the year, and with such an assessment, many gamers will be concerned that World War Z graphics require excessive hardware from many good gamers. is not. Below is the configuration of World War Z on the computer.

1. PUBG Lite player configuration on computer, laptop
2. Configure Mobile Alliance and how to choose the player
3. Configuration of Assassin's Creed Unity on the computer

## Minimally configure World War Z on the computer

1. **Operating system:** Windows 7 64bit or more
2. **CPU:** Core i5-750 or Core i3-530 or AMD Phenom 2 X4-810
3. **RAM memory:** 8GB
4. **Graphics card:** Nvidia GT 730 2GB or AMD R7 240 or Intel HD530
5. **Free space:** 20GB

## Configure World War Z requirements on the computer

1. **Operating system:** Windows 10 64bit
2. **CPU:** Core i7-3970 @ 3.5GHz
3. **RAM memory:** 16GB
4. **Graphics card:** Nvidia GTX 960 2GB or AMD R9 280
5. **Free space:** 20GB

According to the minimum configuration that the game publisher suggests, World War Z's configuration will not be as heavy as most current PC game titles. Just configure your PC to have a Core i3-530, 8GB of RAM and an Onboard GPU that will be able to play World War Z at medium configuration.

However, for many gamers who want to experience World War Z at the most realistic graphics level, they must buy this game a Core i7-3970 and an Nvidia GTX 960 card to be able to achieve 1080p 60fps resolution. This level of configuration is not too high at the present time, and 16GB of RAM is so that when you freeze Zombie, you will not lose FPS.
