Changing font code , changing fonts VnTime to Times New Roman will help **correct font errors** in old Word documents, help you read and edit more easily. Here's how to switch fonts with Unikey.

Sometimes in the process of working with word in learning and work of each of us, at least once we encounter the case of font error or want to convert the font that we often use to the requested font. To convert fonts as we wish, we can directly use Unikey Vietnamese built-in tools that many people do not pay attention to, very fast and very easy to convert. Please refer to the instructions below of TipsMake.com offline.

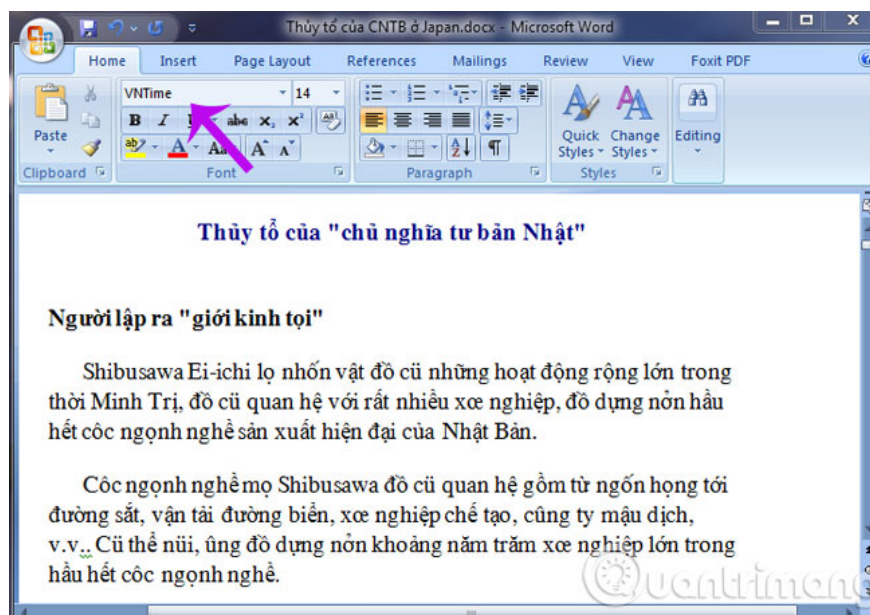

How to transcode the font, convert VnTime to Times New Roman

To switch fonts and fix VNTIME font errors, follow these steps:

Step 1 : Download Unikey, run Unikey on your computer.

Step 2 : Open the file containing the original text, copy the paragraph to change the font by copying (*Ctrl + C*) or cutting (*Ctrl + X*)

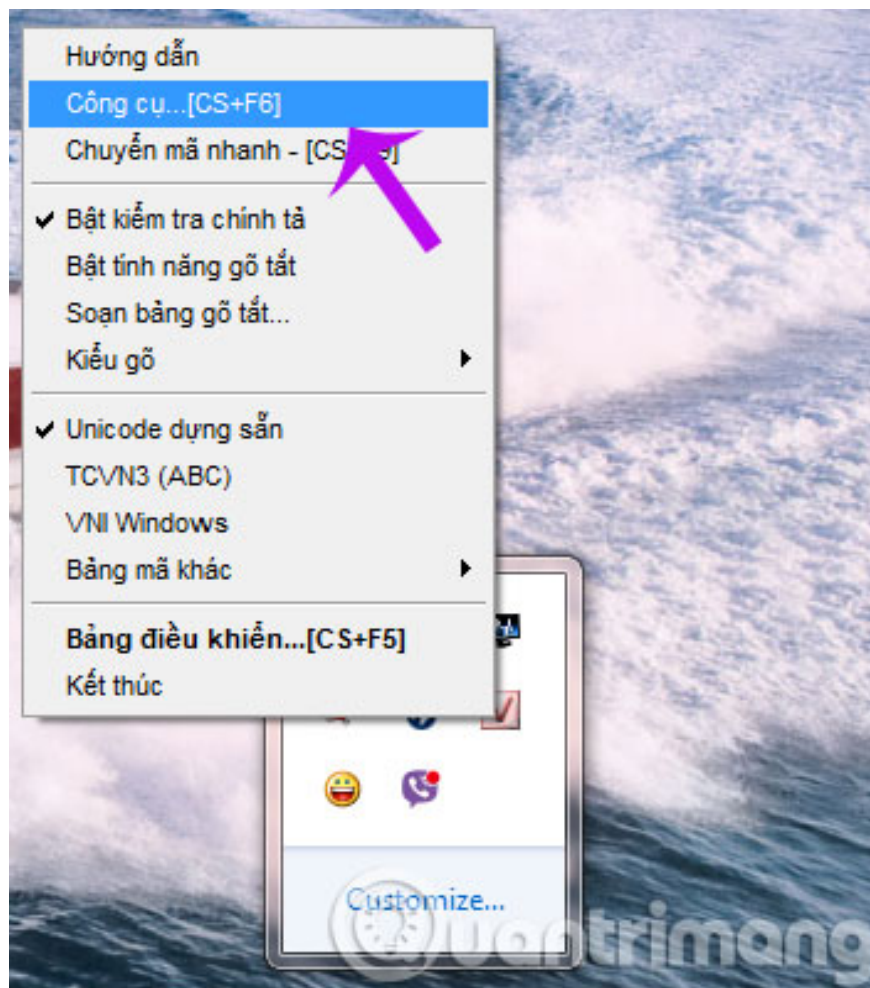

For Specifying what type of text is typed, you just need to point your mouse at the content and look at the font box on the menu. This is very important, because if you determine it incorrectly, after the transcoding the font will fail.

Please note the criteria between the encoding and font as follows:

1. **TCVN3** code table applies to .Vn fonts (for example: .VnTime)
2. **VNI window** encoding then applies to **VNI** fonts (eg VNI-Thufap)
3. **Unicode (UTF-8) encoding , Telex input** , apply to fonts like **Times New Roman** , fonts that are usually available when operating the operating system.

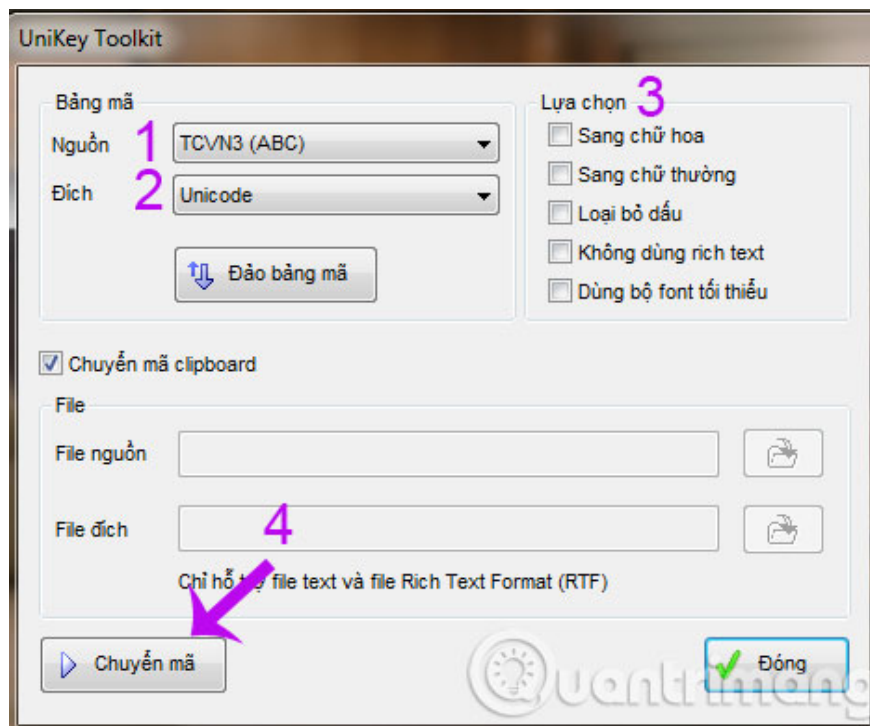

Step 3 : Right-click the **Unikey icon** in the lower right corner of the screen, select **Tools .** or press **Ctrl + Shift + F6**

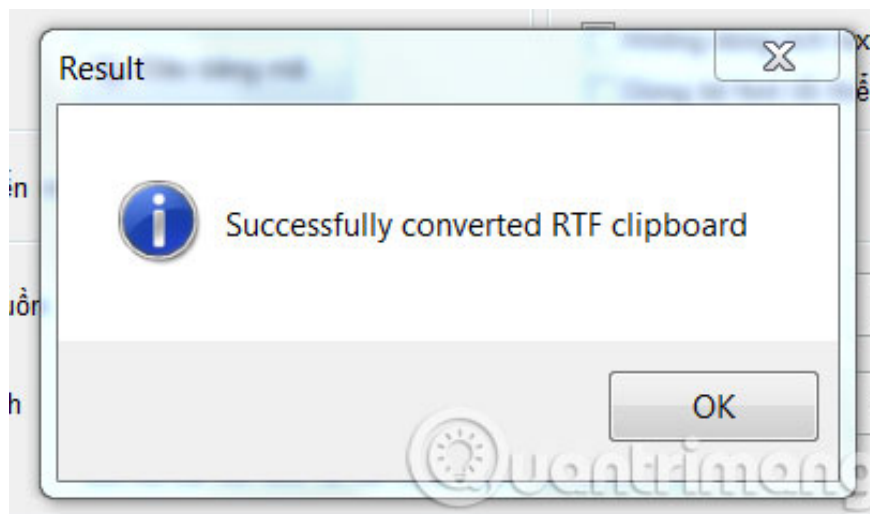

Step 4: The **Unikey Toolkit** dialog box appears, do the following:

1. Select **Source** Code Table (for example, TCVN3)
2. Select **Destination** Code (the encoding you want to move to, here for example, Unicode encoding)
3. Same with a few other options

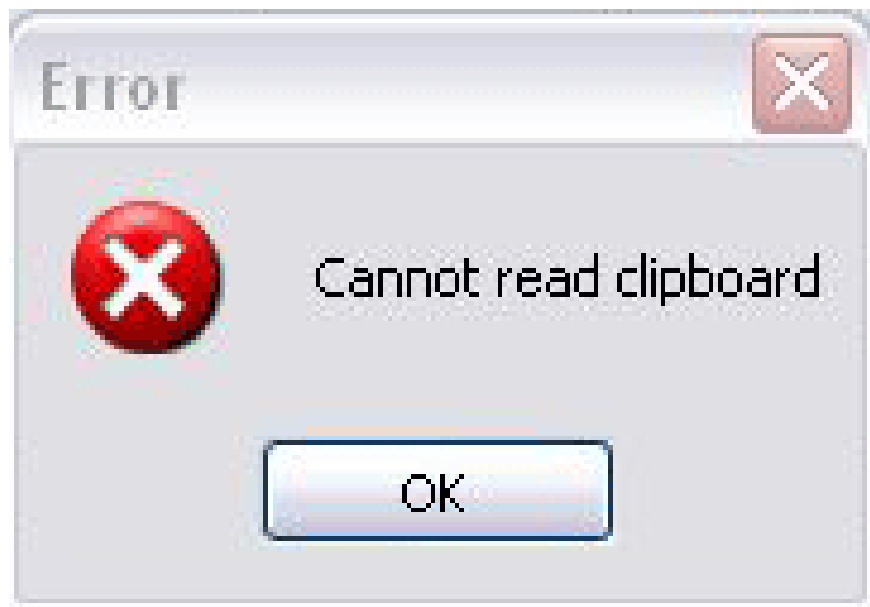

Step 5: After you have made your selection, click **Transfer code**

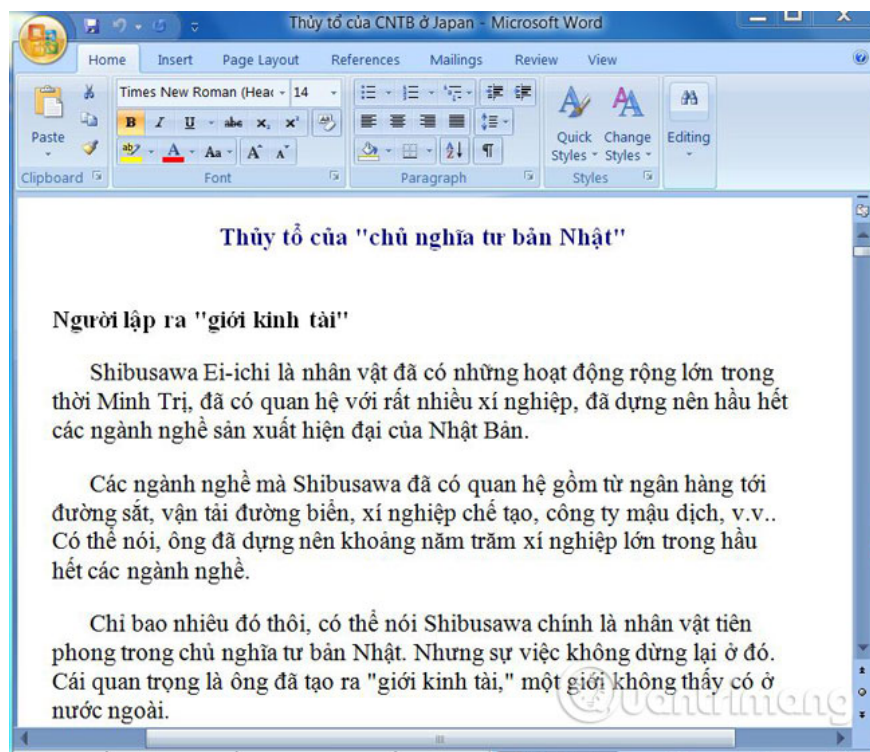

Step 6 : Then a dialog box informs you that you have successfully transcoded.

If you have not done Copy or Cut, a window will appear:

Step 7: Paste (press **Ctrl + V**) the text content into the new file. The text content after **transcoding the font** is displayed as follows:

With just a few simple steps, you have a converted text font according to your requirements, learning goals and work.

1. How to transfer unsigned text with Unikey
2. How to use the shortcut function in Unikey?
3. Fix the error Unikey can't type Vietnamese

Good luck!
