

Convert MBR to GPT with no data loss

Some of you want to convert a hard drive from MBR to GPT but are worried that you will lose all your internal data. Thuthuatphanmem.vn will guide you to convert MBR format to GPT hard drive with just a few simple steps without losing data.

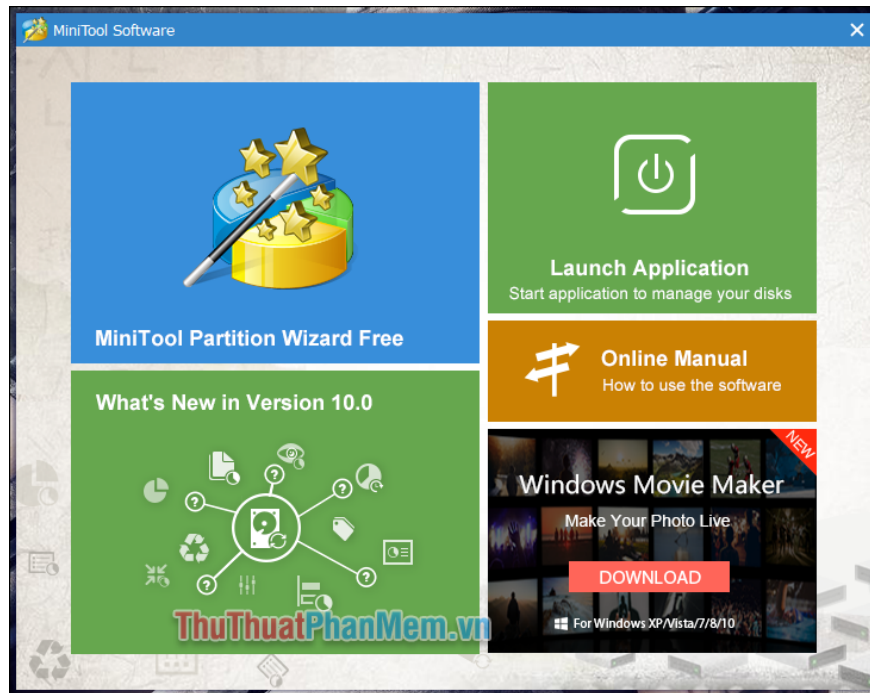

You may not know, hard drives store data in 2 formats that are MBR and GPT. The MBR format is an old format that only supports hard drives with a capacity of 2 TB or less and supports four primary or three primary partitions plus an extended partition, and hard drives larger than 2TB it cannot be controlled. With GPT format, it is possible to manage hard drives larger than 2TB and support up to 128 primary partitions in Windows operating system. Besides, GPT format can boot windows with UEFI standard which is a new security standard higher than MBR - Legacy BIOS standard. Some of you want to convert a hard drive from MBR to GPT but are worried that you will lose all your internal data. But do not worry, the following article by Thuthuatphanmem.vn will guide you to convert MBR format to GPT hard drive with just a few simple steps without losing data. Please follow along.

To convert hard disk format MBR to GPT without losing data we will use the **MiniTool Partition Wizard** software .
