**TipsMake.com - In the following article, we will introduce you some basic operations to convert PDF documents into ebook format EPUB, MOBI or HTML, easy to use and compatible with devices Kindle. Specifically, we will use software called Caliber and another popular online service - Zamzar .**

## Using Caliber :

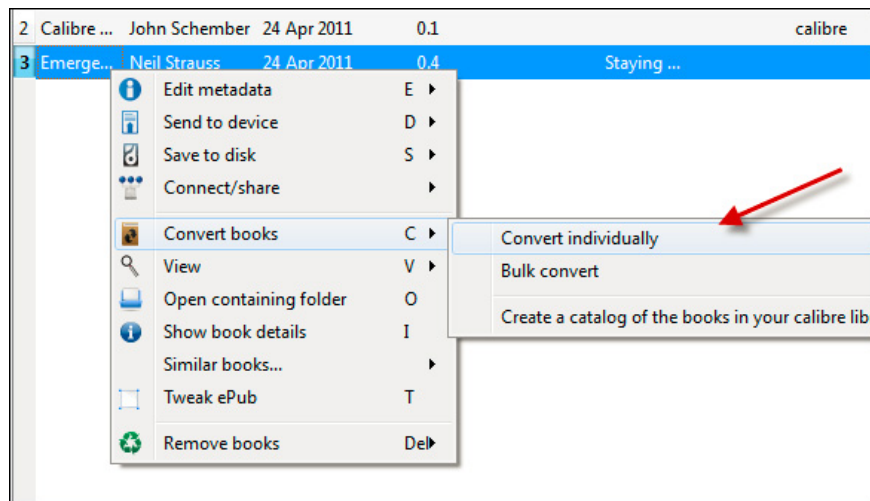

First, visit the Caliber website, download the latest version and install it on your computer. The main console of the program will look like the image below:

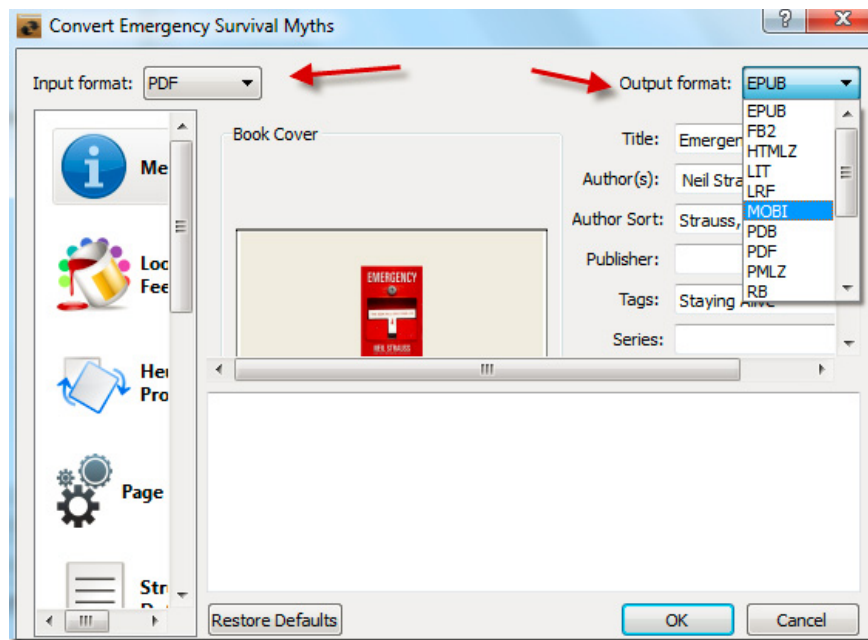

Here, you will see the **Add Books** button at the top left, click this button to assign a **PDF** file to convert the format:

The next window displays, right-click on the file you just assigned in the previous step and choose **Convert books> individually Convert**:

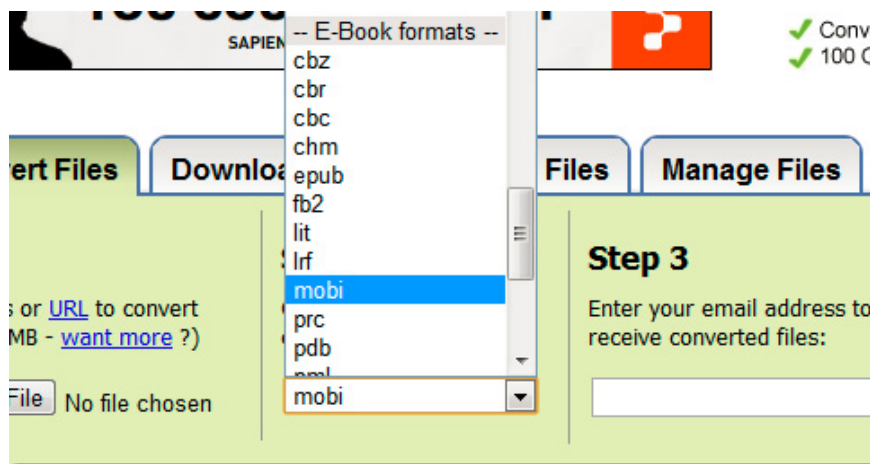

In this **Convert** window, we have **Input** and **Output** options on both sides, choose the format that meets the requirements:

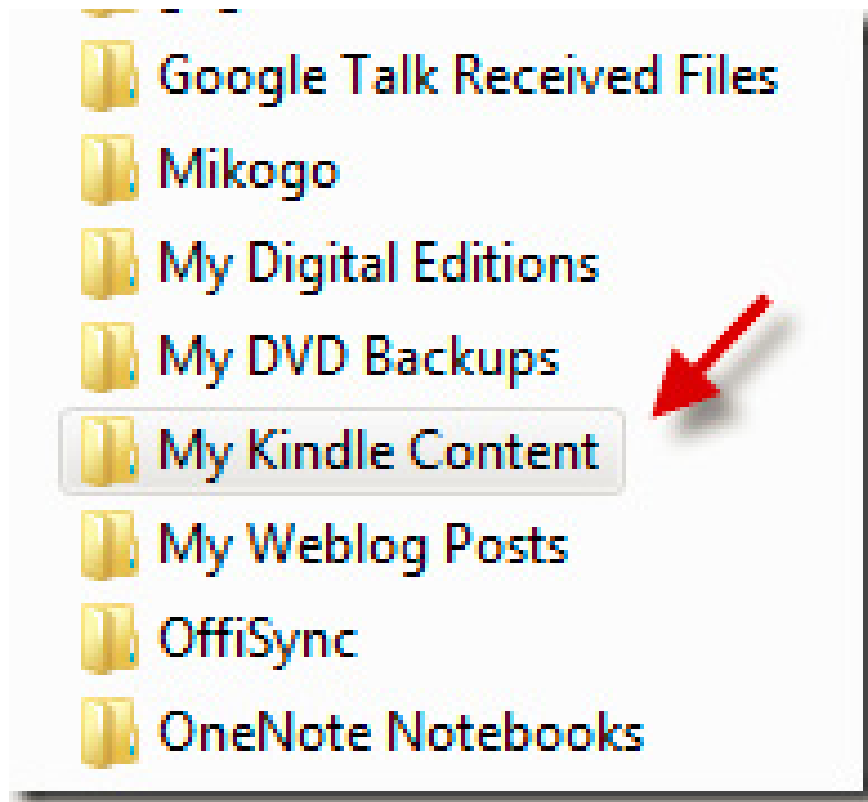

After clicking OK, and the format conversion process will begin. If you do not specify any other Output folder, the system will automatically save to the **C: UsersUsername folder** of the system, and this completion time depends on the size of the original file.

### Use Zamzar :

This is one of the most popular online text file conversion services today, supports a wide range of document formats, of course including **PDF, EPUB, MOBI files** . Main interface of This tool is very simple, all you need to do is select the file to convert, point the path, select the output file format, enter the email address and click the **Convert** button:

If you want to use this MOBI file on Kindle devices, save the document to the **My Kindle Content** folder, found in the **My Documents** section of **Windows** :
