If you are in need of converting the video format, but wondering what software to choose? Please join TipsMake.com to learn how to convert videos using Format Factory in the following article:

If you are in need of converting the video format, but wondering what software to choose? Please join TipsMake.com to learn how to convert videos using **Format Factory** in the following article:

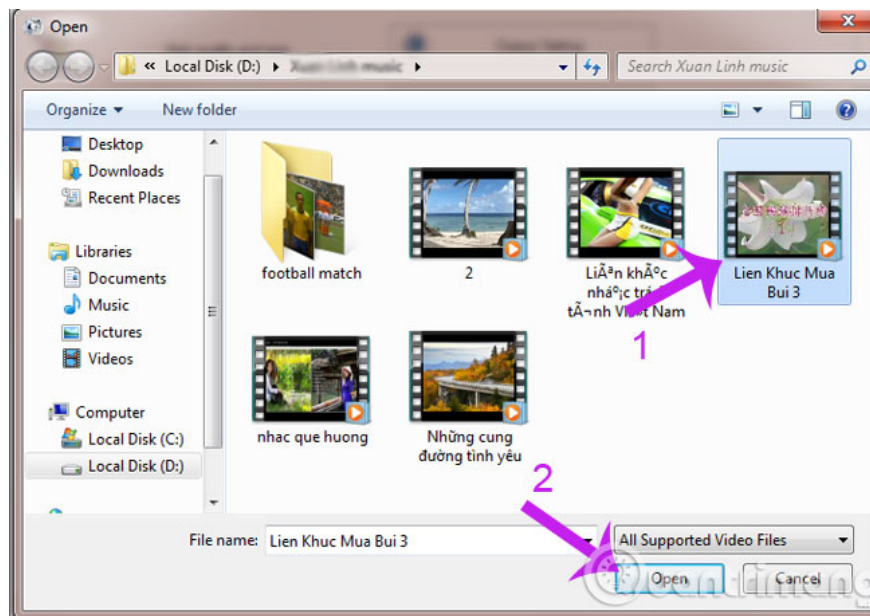

**Step 1** : At the main interface of Format Factory, click on the **Video** item and select the format you want to switch to

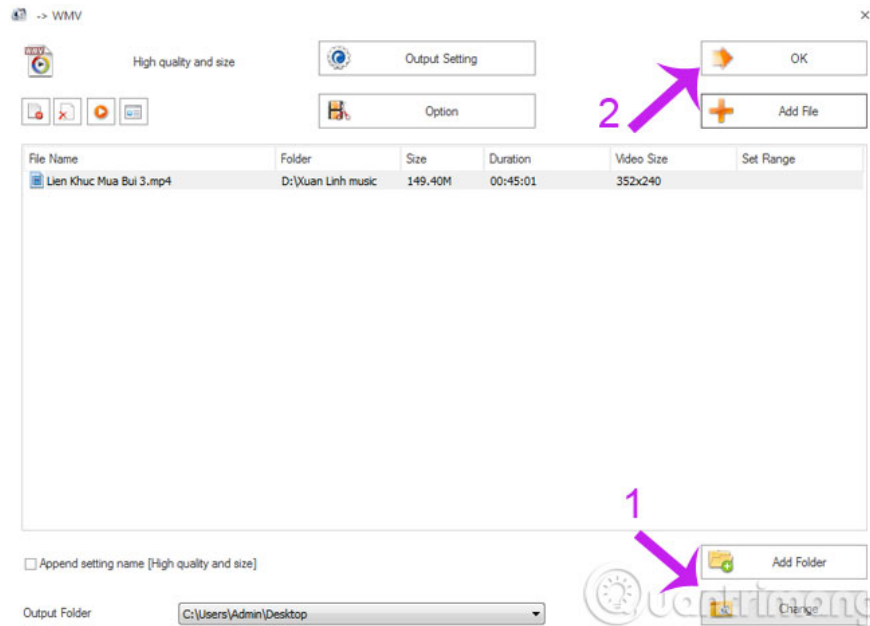

**Step 2** : After the **WMV** window appears, click on **Add File** to select the video you want to convert.

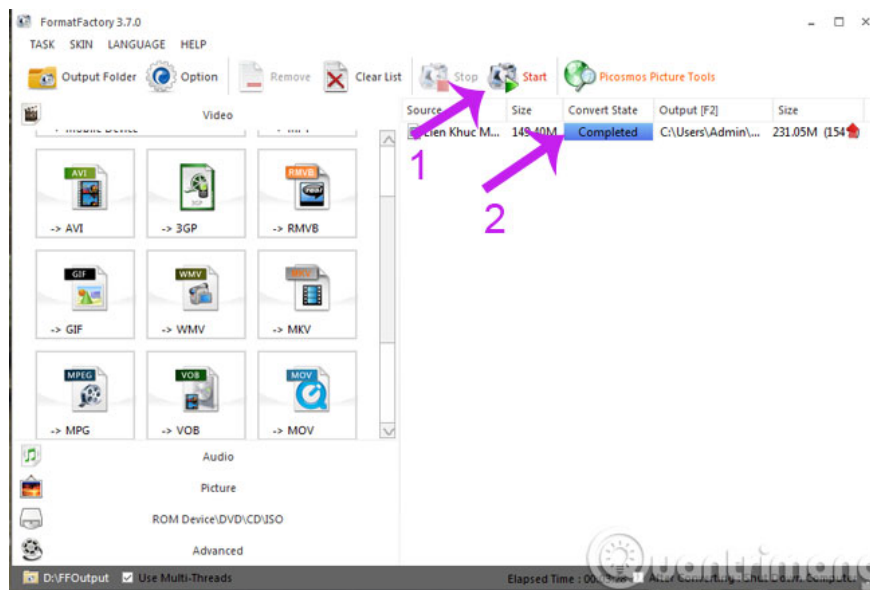

The **Open** window appears, navigate to the folder containing the file to be converted, then click **Open** .

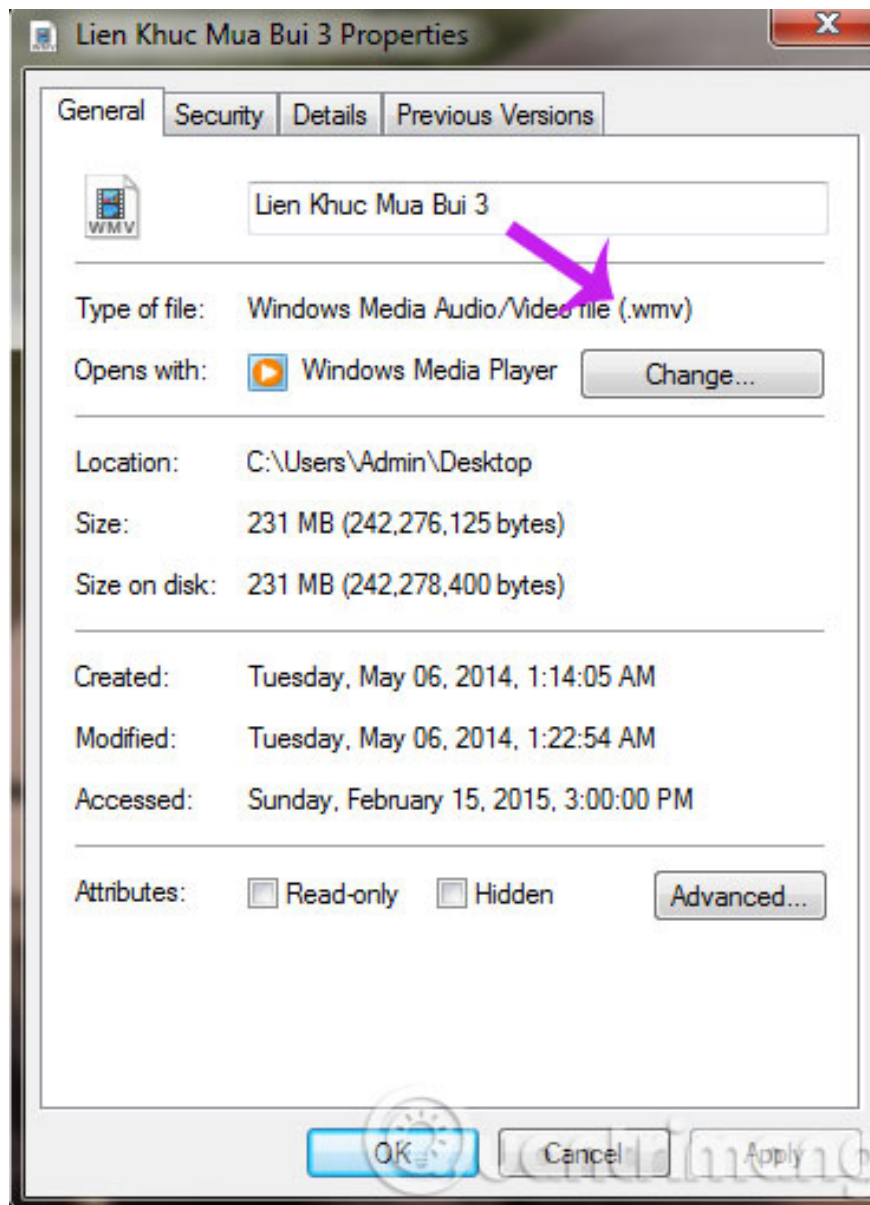

**Step 3** : Click **Change** to change the output file storage location. Then press the **OK** button to save the changed parameters.

**Step 4 :** On the main interface, click on **Start** to start the Video conversion process. When you see the **Convert State** field on the **Completed** line, the conversion process is completed.

**Step 5 :** And this is "finished product":

**I wish you a good working week!**
